## Walsall South Area Panel

# Thursday, 16 July 2015

# **Highway Maintenance Prioritisation**

Cabinet approved the Highway Maintenance Strategy for the next three years at its meeting of 18 March 2015. This introduced a new scored system for prioritising Highway Maintenance schemes across the borough. The background and principles of this approach are given in the report itself which can be viewed at:

#### Cabinet Report March 2015 - Highway Maintenance Strategy

Chapter 3.15 of the Cabinet report states:

"3.15 The proposed matrix incorporates the ability for the Area Partnerships to influence the ranking of schemes and further consultation with Partnership Chairs and Managers will take place in March/early April. One proposal is to give the partnerships the ability to credit up to 100 points either to a single scheme or divide the 100 points across a number of schemes identified for their areas. The delegated authority to amend the programme includes the ability to accommodate the local priorities identified through this route."

The issue was discussed at the Area Panel Chairs meeting on the 19 March. The agreement reached at that meeting was that rather than have 100 points per Area Panel it would be more equitable to award 50 points per ward. This was agreed and has now been incorporated into the scoring matrix attached. Also attached is the list of identified highway maintenance schemes.

With available budgets it will not be possible to undertake all these maintenance schemes in the next three years hence the need for a robust and transparent prioritisation system. As stated in the Cabinet report it is important to incorporate local priorities and the purpose of this report is to seek Area Panels input.

It was originally intended to incorporate Area Panel scores into this year's maintenance programme. However it is acknowledged that the allocation process is not straightforward and will take some time to complete. The annual highway maintenance programme for 2015/2016 is at an advanced stage of delivery, it is therefore proposed to implement the Area Panel scoring into the 2016/2017 programme. The programme is determined in February of each year so it is important that each Area Panel provide their scoring to officers prior to this date.

### In Summary:

- 1. The Area Panels are asked to score the identified schemes to reflect their local knowledge and priorities.
- 2. There are 50 points available per ward.
- 3. These points can be awarded to one scheme or divided across a number of schemes.
- 4. The more points awarded to a scheme the greater influence this will have on its relative priority.

#### Recommendations

That the Walsall South Area Panel:

- Note the report and identified schemes
- Provide officers with their scoring, prior to February of each year

John Roseblade Group Manager, Highways and Environment 01922 654391 John.Roseblade@walsall.gov.uk

Maintenance Assessment Category "MAC"	Description	Weighting/Value
Delayed/Deferred Scheme	Maintenance schemes that have been put on hold due to external engineering constraints, such as: statutory undertakers planned works; significant adjacent construction projects; traffic management & road safety schemes. These locations will be given greater priority once the constraining issues have been removed. Also includes locations listed in previous programmes, but not completed, so are required to be carried forward.	50
Co-ordinated Scheme	Maintenance schemes that require programming in conjunction with: regeneration initiatives; flood management works; match or grant funded works; collaborative schemes with neighbouring highway authorities.	50
Commercial Impact	Maintenance locations that contribute to concentrations of industrial, economic or commercial activity, including: industrial estates; retail parks; main high street areas; road safety schemes.	30
Social Impact	Maintenance locations that contribute to significant community facilities, including: hospitals; museums/art galleries; schools/colleges; sports facilities.	30
Local Priority	Maintenance locations that have been identified by Councillor's & MP's on behalf of local residents & businesses	75
Partnership Management Priority	Maintenance locations that have been identified as local priorities via the Area Panels. (maximum of 50 points to be allocated per ward on one or between a number of schemes)	1-50
Public Complaints	Maintenance locations where complaints have been received from the public: letters; e-mails; telephone complaints; petitions.	30
Safety Inspector Priority	Maintenance locations that have been identified as priorities for planned maintenance by inspectors undertaking routine safety inspections, AND Column is updated then on an Annual Basis	100
No. of Pothole Repairs	Maintenance locations identified through the mapping & analysis of reactive maintenance activities over 3 year period.	30
No. of Risk & Insurance Claims	Maintenance locations identified through the mapping of third party liability claims.  Current Year Only -	30
Traffic Sensitivity/Traffic Volume	Maintenance locations subject to H.A.U.C restricted working requirements, where traffic volumes impose additional network loadings which can give rise to more rapid rates of deterioration and increased potential for third party liability claims.	20
DfT Road Classification	DfT Road Classification: Classified Principal A Roads - major roads intended to provide large scale transport links within or between areas; Classified Non Principal B Roads - roads intended to connect different areas, and to feed traffic between A roads and smaller roads on the network; Classified unnumbered Non Principal C Roads - often linking housing estates to the rest of the network; Unclassified Roads - local roads intended for local traffic. This information is held within the Council's UKPMS system. (Only A, B, & C Roads contribute to a score)	5
Multimodal Travel Priorities	Maintenance locations contributing to key travel objectives such as; bus routes; cycleways; safer routes to school.(Changed to Walking School Bus).	5
UKPMS Ranking	Schemes that have been identified in contributing to the Council's national performance indicators	10
EPI Ranking	All locations identified for potential inclusion within the Council's forward works programme are subject to an Engineering Programme Inspection and are categorised within a 1 to 3 prioritisation ranking.	10
DfT Road Hierarchy	DfT Road Hierarchy: 1 - Motorways; 2 - Strategic Routes (Trunk/Primary A Roads); 3a Main Distributor Roads (Non Primary A Roads/heavily trafficked B Roads); 3b - Secondary Distributor Roads (B Roads/heavy trafficked C Roads); 4a -Link Roads; 4b Local Access Roads. (A, B & C Roads are scored under DfT Road Classification - This score is contributed to by Unclassified Roads only)	5
Estate Management Override Score	Maintenance schemes grouped together by location, age, deterioration type & engineering treatment. (An override score is added in this field so that all estate management scores are equal to the primary scheme on the estate)	*
Scheme Completed	Maintenance scheme negative multiplier identifying that appropriate structural maintenance work has been completed on site to reduce the locations overall score.	-1000

Proposed Year

Target maintenance year identified through the EPI for the most economically advantageous treatment time.
