

Cabinet – 14 September 2011

Walsall Housing Strategy 2011 – 2016 Delivering new and improved homes for the people of Walsall

Portfolio: Councillor Adrian Andrew, Deputy Leader, Regeneration

Service: Housing Service

Wards: All

Key decision: No

Forward plan: No

1. Summary

- 1.1 The Housing Strategy 2011 – 16 (Delivering new and improved homes for the people of Walsall) details our housing priorities for the next five years, and how we intend to achieve them.
- 1.2 Our strategic housing priorities are to:
 - increase housing choice and employment opportunities
 - Tackling fuel poverty and improving the quality and energy efficiency of existing and future homes,
 - address different needs and promote independent living, health and well-being
- 1.3 The Housing Strategy recognises the wider strategic role that Walsall Council has in place shaping, and the co-ordination role to facilitate the delivery of future housing growth and the improvement of existing dwellings across all wards of the borough.

2. Recommendations

That Cabinet recommend to Council the adoption of the Housing Strategy 2011 – 2016 **Appendix A**

3. Report detail

- 3.1 The Local Government Act 2003 places a requirement on local authorities to develop a Housing Strategy, setting out the vision for all housing in its area and the priorities for housing and housing-related services in the borough.

- 3.2 In 2008, Council adopted Walsall Housing Strategy 2008 – 2011. During this period the council has had a number of achievements including enabling £50million of Homes and Communities Agency (HCA) housing investment delivering approximately 1000 affordable homes.
- 3.3 The new Housing Strategy has been the subject of a comprehensive review and reflects the Council's emerging housing plans for the next five years, taking account of changes in the housing market and the impact of the recession.
- 3.4 The Housing Strategy 2011 - 2016 is a plan to address housing issues across all housing tenures. It is the overarching strategy for housing in the borough, and provides the framework through which housing providers and investors can meet needs and demands more effectively from available resources. It establishes the issues and priorities for housing and sets out an action plan on how these issues and priorities will be addressed by the Council and its partners.
- 3.5 The Strategy links into the Council's strategic aim of facilitating quality, choice and diversity in the housing market and to create strong and self reliant communities. The strategy aims to develop sustainable neighbourhoods that can retain successful households and offer opportunities to inward movers and investors, reducing the disparities between neighbourhoods within the borough and providing linkages to economic growth and employment opportunities. The strategy prioritises the council's work in addressing fuel poverty and puts us at the forefront of delivering the green agenda.

4. Council priorities

- 4.1 The council's purpose is to 'Maintain and improve the physical and economic environment for the health and wellbeing of our residents within financial constraints and to operate efficiently and collaborating within a one Council model and with partners to ensure value for money for tax payers and their funders'
- 4.2 The Housing strategy is relevant to all aspects of the council's priorities
- Health and Wellbeing
 - Communities and Neighbourhoods
 - Economy
- 4.3 The Housing Strategy aims to achieve increased numbers of new homes, including affordable homes, and greater access to better quality more energy efficient homes. The strategy aims to ensure that this investment generates work and training opportunities for the residents of the borough. The strategy also recognises the impact on the health and wellbeing of our community from living in safe and secure accommodation.

5. Risk management

The Housing Strategy gives a clear overview of Walsall's housing needs and aspirations. Not adopting this strategy could result in the loss of funding/partner interest to deliver affordable housing and other housing related regeneration activity.

6. Financial implications

The cost of producing the document (including draft documents for consultation) has been met from existing resources. The adoption of this strategy is likely to help maximise the amount of external housing related funding secured into Walsall. The Strategy has been developed to shape the future housing market in support of economic growth.

7. Legal implications

There are no significant legal implications

8. Property implications

There is no explicit property implication

9. Staffing implications

There are no significant implications in terms of IT or human resources as a result of this strategy.

10. Equality implications

An Equalities Impact Assessment (EIA) has been developed in tandem with the development of this strategy. In addition local EIAs have already been developed with regard to many of the local housing related activities contained within this strategy (for example in relation to the Local Investment Plan, Housing Allocation Scheme).

11. Consultation

- 11.1 The Strategy has been developed in consultation with all key partners, stakeholders and the community. This has included stakeholder events, consultation through Walsall Partnership and we have made the draft document available for comment by the public through our website.

11.2 In consideration of the feedback received from the consultation and the Council's own priorities for housing, the following key strategic aims have been identified for the new Strategy:

- To work with partners to increase the supply of affordable homes across the Borough
- To prevent homelessness and increase employment opportunities
- To improve homes, services and neighbourhoods
- To improve housing conditions in the private sector and reduce the number of empty homes
- To ensure that all residents have fair and equal access to housing.

Housing Strategy 2011-2016

Draft August 2011

**Delivering new and improved homes
for the people of Walsall**

DRAFT

Foreword

Walsall Council welcomes the opportunity to present our latest Housing Strategy 2011-16

Walsall Council is responsible for the preparation of a Housing Strategy which assesses housing needs in the area, across all tenures. It is a planning document which sets out how we will tackle the various housing issues within Walsall, the resources that are needed and, the time in which the various tasks need to be completed

The Council is committed to meeting the needs and aspirations of the people within the borough, by providing an environment for strong housing growth, as well as making the access to good quality housing fairer and more flexible. The Strategy has been developed following extensive consultation and engagement, ensuring clarity about housing priorities and how we will deliver them.

The Strategy also takes into account the current difficult economic environment and has investigated new ways to do things in order to maximise results. This Housing Strategy can make a difference to the local economy by maximising jobs in the construction industry, supporting trades people and suppliers, enabling new housing related businesses, and increasing the number of local trainees and apprenticeships. This strategy strengthens the links between housing and employment and is looking to the low carbon economy to drive through new provision, increased skills and market leadership.

It will act as the basis for discussion about how to do things differently to get better results with the Homes and Communities Agency, with our housing associations and with other key partners in terms of delivery of both the strategic housing priorities and the Local Investment Plan.

Housing plays a significant role in the lives of everyone. The quality of our housing, how much it costs and where people live continue to be some of the biggest influences on people's quality of life. Good quality homes play an essential part in economic growth, educational attainment, public health and community cohesion.

The underlying ambition of this strategy is to turn the challenges we face into opportunities not only to ensure that we deliver value for money housing services and better quality life outcomes for residents but also that we can continue to help improve and grow the borough's economy. We are confident that together we can make a difference on all fronts.

We thank all who have contributed to the Strategy and their commitment to work with us, turning the housing challenges of improving the quality and energy efficiency of our homes, addressing fuel poverty, providing more affordable homes and bringing empty homes into use, into opportunities for the future.

We look forward to working with you all in the coming years to implement this Strategy to make Walsall an even better place.

Achievements

The previous Housing Strategy successfully generated a number of achievements over the last three years. The current Strategy aims to build on this success and make connections to the current challenges facing our residents such as economic prosperity, educational attainment, health and community sustainability.

Our key achievements since the last strategy include:

- £16 million of housing grant and loan work completed on 2072 homes
- 372 major Disabled Facilities Grants (DFG) delivered
- 1,121 private sector homes made free of category 1 hazards
- Developed and delivered the 1st Community Energy Saving Project (CESP) in the UK which helped 149 Whg and 152 private families with an investment of approximately £3.1 million
- We have enabled £50 million of Homes and Community Agency (HCA) grant for approximately 1000 affordable homes which includes Waterfront South. This provided 158 homes, including homes for key workers (doctors and nurses) and contributed to the overall place making agenda.
- Providing housing related support to 616 vulnerable households in the borough
- £455,000 saved in ensuring homeless household are re-housed through the nomination agreement reducing bed and breakfast costs (estimated at 10 families of 5 nights)
- Prevented 701 households from becoming homeless
- 222 repossessions prevented via provision of court desk facility
- Partnership working has seen 83 severely overcrowded households and 126 under occupied households re housed

To ensure a consistent and comprehensive strategic approach to housing, we have successfully merged a number of our housing related strategies such as our Homelessness, Black Minority Ethnic and Private Sector strategies into this document.

Vision and Priorities

The Council Purpose is to:-

‘Maintain and improve the physical and economic environment for the health and wellbeing of our residents within financial constraints and to operate efficiently and collaborating within a one Council model and with partners to ensure value for money for tax payers and their funders’

Whilst working to this purpose the Council is committed to the following priorities

- Health and Wellbeing
- Communities and Neighbourhoods
- Economy

The Regeneration Directorate's purpose is to 'create the conditions for sustained economic recovery and growth'.

Based on our achievements and evolving housing markets the council has reviewed its housing vision and priorities from its previous Housing Strategy 2008-2011.

Our revised vision and priorities are a result of; consultation with residents and partner agencies, an analysis of our local housing need, and changes in national and regional policy.

Our Housing Vision is to:

'Ensure access to a choice of sustainable, quality homes that meet the needs of our communities'.

Our strategic housing priorities are to:

- increase housing choice and employment opportunities
- tackling fuel poverty and improving the quality and energy efficiency of existing and future homes,
- address different needs and promote independent living, health and well-being

We want to:

- Create and maintain neighbourhoods where people want to live and work in
- Work with partners to support good neighbourhood management models
- Improve the condition, quality, energy efficiency and choice of housing in Walsall and contribute to the social and economic well being of the borough helping to deliver sustainable communities and reduce fuel poverty.
- Support economic growth and help reduce worklessness
- Provide greater housing choice to meet a wide variety of needs including the needs of our ageing population, those with disabilities and new and emerging communities,
- Ensure there is a wide range of support options available to meet the needs of vulnerable people to help them manage their home and live independently for longer.
- Maximise investment in priority areas, particularly in a period of constrained resources, to support economic growth and reduce worklessness

Strategic Links

National Context

There have been dramatic changes in national and international factors affecting housing since the previous version of this Strategy was prepared in 2008:

1. Several years of economic growth were largely caused by excessive lending to fund housing. This lending led to high house prices that made private owner-occupation housing unaffordable for many.
2. This lending proved to be unsustainable. The subsequent 'credit crunch' led to the recession, which has resulted in loss of output and employment.
3. The downturn in the housing market has caused a lack of confidence in new build housing investment
4. The reduction in the willingness of lending institutions to provide funding has affected both developers and those wanting to access mortgages (especially for first time-buyers).
5. Unrest in oil producing countries has led to significant rises in the cost of living, with the Consumer Prices Index being 1.5 in April 2005 and 4.5 in April 2011.

Within this context, the new Government that took office in May 2010 has set a number of priorities. These include increasing housing supply and providing more homes that people want in the places where they want them. At the same time, the significantly reduced availability of public finance for both housing and regeneration is requiring local authorities and others responsible for housing provision to find new ways of attracting more investment into housing and delivering better value for money.

The other key policy proposals that will affect this Housing strategy include

- Localism which seeks to empower local communities to have more say over their local area.
- Welfare Reform which seeks to cut the overall level of welfare benefit by capping Housing benefit and moving towards universal credit.
- Changes to social housing which include the replacement of grant funding for social housing with an affordable housing scheme, new products such as affordable rents and greater letting flexibility

The Localism Bill is expected to obtain Royal Assent by the end of 2011 and proposes devolving greater powers to councils and neighbourhoods and gives local communities more control over housing and planning decisions.

The Housing and planning provisions will:

- Abolish Regional Strategies that currently set new housing numbers at a regional level. The numbers would instead be set by individual local planning authorities, based on an assessment of housing need in their areas.
- Amend the Community Infrastructure Level (CIL) which allows councils to charge developers to pay for infrastructure.

- Provide for Neighbourhood Plans which would allow neighbourhoods to prepare their own development plans in support of additional housing.
- Give local authorities the power to limit who can apply for social housing within their area and to discharge their duty to homeless people by using privately rented accommodation.
- Introduce flexible tenancies which will provide people with choice quality and greater mobility.

Sub-regional context

The West Midlands lags behind the national average in terms of GDP per capita and the shortfall has grown steadily over the last fifteen years. The region is ranked only seventh among the nine English regions.

- The West Midlands is behind the UK average in terms of productivity and there has been some widening of this gap since 1989.
- Manufacturing remains very significant to the regional economy. Some of the productivity gap arises because the West Midlands have a distribution of activities skewed towards low added-value manufacturing.
- The West Midlands suffers from low investment in research and development and a low incidence of innovation, although this is less marked in manufacturing than in services.
- Skills levels are poor both in terms of formal qualifications and training. Unskilled workers have lower productivity rates, relative to the UK.

These structural features suggest that the West Midlands economy is relatively vulnerable to recession.¹ The declining employment in the region and the fall in wages in real terms are likely to have a significant effect on people ability to access and maintain accommodation.

Income levels are low and high levels of deprivation have had their impact on housing markets which are characterised by:

- Low-value private sector housing - with growing disparities between house prices in the area and regional averages. The primary characteristic of housing markets in the Black Country is the low-value of private housing across most of the conurbation - particularly in the core - with a general lack of higher value and aspirational housing apart from in fringe areas of the outer boroughs.
- A high proportion of social-rented housing - with the Black Country exhibiting some of the lowest levels of private ownership in the region - despite two decades of sales of council stock and clearance of unpopular stock.

The Council is a member of the Regional Homelessness Strategy Implementation Group. The Group has a multi agency/cross authority membership and the purpose of the group is to take forward the key priorities in the Regional Homelessness Strategy. To ensure the implementation and delivery of the Strategy each sub region has developed an Action Plan.

We are a member of the Sustainable Housing Partnership which includes local authorities from the region and is supported by the Black Country Energy Efficiency Advice Centre (EEAC). It provides a forum for local authorities to share and develop best practice, develops

¹ The impact of recession on housing in the West Midlands and the implications for policy. Nevin Leather Associates

joint funding bids and provides opportunities for joint working with private sector partners in the region to help address energy efficiency and fuel poverty issues.

Walsall Council chair Homestamp which is a partnership consortium with an interest in private sector housing. It comprises Local Authorities, Private Rented Sector, Universities, West Midlands Police and West Midlands Fire Service. Homestamp encourages the supply of good quality private rented homes, facilitates information and training for landlords and responds to regional and national issues affecting the private rented sector.

Walsall Council is part of the Black Country Consortium that seeks to ensure the four local authorities work effectively and provide direction and leadership on a range of issues. These have included the development of the Black Country Core Strategy and initiatives like the New Growth Points Housing Programme.

The Black Country

Walsall sits within the Black Country sub-region which includes Wolverhampton, Sandwell and Dudley councils. The councils work together to share good practice and identify any potential cross-authority working

The Black Country Core Strategy was adopted by the four authorities in February 2011. It carries forward the approach established through the work of the West Midlands Regional Spatial Strategy to direct housing and other growth in the region to the Major Urban Areas, with major commercial development in the Black Country directed to the 'strategic centres' of Walsall, Brierley Hill, West Bromwich and Wolverhampton, and new housing concentrated on brownfield sites in a series of regeneration areas based around public transport corridors. The four local authorities aim to provide a minimum of 11,000 new affordable dwellings between 2006 and 2026, in partnership with developers and the Homes and Communities Agency. Walsall's housing target up to 2026 is to build an additional 11,973 new homes (net) across all tenures. This equates to 599 net new homes each year.

Walsall Council is a member of the Black Country Local Enterprise Partnership (LEP). The LEP consists of representatives from business, higher education, and the four local authorities. The LEP aims to deliver economic growth in the Black Country and enable private investment to improve the competitiveness of the Black Country, including;

- providing a voice and focus to drive exports and inward investment to lever private sector investment and employment;
- providing a single voice for the Black Country to define and agree public sector investment priorities with Government and provide a "bridge" between stakeholders in the Black Country and Government, driving sustainable, long term change;
- maintaining the shared integrated economic and spatial strategy to achieve those goals;
- prioritising and securing investments in key programmes to implement our shared strategy;
- promoting enterprise and innovation in partnership with the private sector for the benefit of our diverse communities ;
- coordinating delivery plans maximising the opportunities presented by publicly owned assets;
- securing innovative funding/development mechanisms to drive major change and investment

- preparing (jointly with the Integrated Transport Authority) an Integrated Transport Plan including acting as the nominated accountable body for the Black Country; and
- providing intelligence to monitor and evaluate our performance using the already established Black Country Performance Management Framework.

The objectives that will drive the Black Country LEP are:

- raising incomes to national levels enabling our businesses to become more competitive, modernise, diversify and up skill their workforce;
- growing the population of the Black Country with the economic growth that this brings;
- attracting and retaining balanced communities, and
- transforming our environment in accordance with the principles of sustainable development.

Local Context

Walsall's Sustainable Communities Strategy requires the Council and its partners will work together to improve the economic, social and environmental well-being of Walsall while safeguarding the prospects of future generations². The council will play an important role in developing the local economy, creating jobs and increasing prosperity, providing high quality affordable housing and Improving health and well-being.

The Council has six neighbourhood management areas which are the delivery mechanism for the Sustainable Communities Strategy. These areas are matched by Area partnerships that aim to:

- Engage with local communities to identify key priorities, which reflect resident concerns but which are also informed by data and intelligence and which complement borough-wide objectives.
- Equip and empower local communities to solve local problems. A key way to do this will be enabling local people and their representatives the opportunity to influence the allocation of public resources to ensure these are sensitive to local priorities.
- Ensure that the delivery of public services is co-ordinated resulting in better services for our communities and a more efficient use of resources.

The Council has produced a Local Economic Assessment (LEA) that has provided an understanding of the conditions required for business to work and for people to take advantage of economic opportunities. It will ensure that economic planning and regeneration are based on a sound understanding of the economic strengths and weaknesses of the area. Our Housing Strategy will help meet the infrastructure requirements which will enable people to work in the borough and have access to good quality homes.

Walsall Child Poverty Strategy (2008) highlights the need to promote employment and job opportunities for residents in Walsall. The strategy recognises the need to concentrate on the attainment of 0-5 year olds and their families in the most deprived areas and work with education partners to narrow the attainment gap between disadvantaged pupils and their peers.

² Every place has its time and now its Walsall's time, Sustainable Communities Strategy, Walsall Borough Strategic Partnership. (2008)

Our Local Investment Plan (LIP) 2011-2015 explains how we will deliver a single strategic framework which includes our partner priorities and principles of investment. The LIP sets out our key investment areas and priorities which will contribute to creating a prosperous borough for our residents. Our Housing Strategy sets out how we will deliver elements of our LIP through enabling and facilitating key housing initiatives.

We will contribute to the health agenda by helping to reduce health inequalities by enhancing the health and quality of life of all Walsall Citizens. The Health Inequality Strategy³ for the borough details interventions which will help ensure those living in the most deprived areas are given the opportunity to access the right services and increase their well-being.

The Council's Working Smarter initiative aims to change activity at the Council so citizens achieve better services which cost the Council less. This will help us deliver our services more effectively and help us react better to the needs and aspirations of our customers. We will embed the requirements of the Working Smarter principles which will help deliver quicker and more cost-effective services for all.

DRAFT

³ Walsall Health Inequalities Strategy 2008-2012, Walsall Partnership

Chapter 1 – A Profile of Walsall

- In 2009 Walsall had a population of 255,900 people. The population has increased over recent years, reversing a period of decline throughout the 1990s⁴.
- Population projections show that the population will continue to increase over the next five years; numbers of dependent people will increase and numbers of people of working age will decrease⁵.
- 65% of households in Walsall are living in owner occupied accommodation, 27% rent from a housing association and the remaining 8% rent privately or live rent free. 32.3% of households include dependent children⁶.
- Walsall has a diverse range of communities living within the borough. People from Black and Minority Ethnic (BME) communities in 2001 accounted for 13.6% of the total population which is an increase of 4% since 1991. The Housing Needs Study Update 2010 showed BME groups account for a total of 34.0% of all housing need in Walsall.
- Employment levels in Walsall are considerably lower than the region and nationally, with less than two thirds of the working age population (63.2%) in employment in comparison to 68.5% in the West Midlands and 70.5% in England.
- In February 2010, nearly 35,000 residents in the borough were claiming benefits, accounting for over 20% of the working age population which is higher than figures nationally (15%)⁷.
- 77,158 people in the borough between 16 and 65 have no qualifications⁸.
- The Private Sector House Condition Survey found an estimated 10,200 dwellings (13%) in Walsall where fuel poverty was present. The private rented sector has, by a substantial margin, the highest rate of fuel poverty at 44% - (2,200) dwellings⁹.
- The Housing Strategy Statistical Appendix 2010 showed a total of 4,219 vacant dwellings of which 1,835 were vacant for over 6 months¹⁰.
- As at January 2011 there were 1,687 private sector dwellings which were empty for over 6 months. 251 properties have been empty for longer than 2 years and are distributed across the borough¹¹.

⁹ Private Sector Stock Condition Survey, March 2008

¹⁰ Housing Strategy Statistical Appendix Walsall 2010

¹¹ Revenue and Benefits Data – Accessed January 2011

- The 2010 Index of Multiple Deprivation ranks Walsall as the 30th most deprived English local authority (out of 326); putting it in the 10% most deprived districts. This is a deterioration of Walsall's position from 2007 when it was in the 13% most deprived authorities, and 2004 when it was among the worst 15%. Deprivation is not evenly spread across the borough: Blakenall, Birchills Leamore, St Matthew's and Pleck are amongst the 10% most deprived areas of the country while parts of Streetly and Aldridge are in the 10% least deprived (see figure 1).

Figure 1: Index of multiple deprivation, 2010

Source: Department of Communities and Local Government

- 28% of children living in the borough in August 2008 were living in poverty which is higher than the national average of 21%. The distribution of child poverty shows Blakenall as the area with the highest proportion of children living in poverty (47%). The analysis showed Blakenall and Birchills Leamore as the wards with the children aged between 0-10 years at most risk of living in poverty as households with children

are likely to contain parents who are not in work or in a lone parent household dependant on out of work benefits¹².

- People in these deprived areas live 8 years less than those in the least deprived wards.¹³
- The health of the people of Walsall continues to be worse than the England average.
- 40% of the borough population are considered as living in the most deprived areas of England.
- 15,238 households were on a social housing waiting list with the majority of people in need of 1 or 2 bedroom properties¹⁴. Of these over 10,465 are in the lowest priority band
- The total number of households accepted as homeless reduced from 2006/2007 to 2010/2011 by 55%. In line with this reduction the total number of families accepted as statutory homeless has reduced from 504 (2006/07) to 172 (2010/2011) equating to 0.67 per 1000 population.
- In 2010/2011, 938 households were prevented from being homeless by our work.
- Over the last 5 years the main reasons for homelessness have been violent breakdown of relationships, parents no longer willing or able to accommodate, and loss or private sector assured short hold tenancy.

Housing Needs and Demand Study (HNS) 2010 Update

- There are two distinct housing markets in Walsall. The west of the borough borders traditional Black Country manufacturing areas with the M6 motorway a prominent feature. Traditional heavy industry, older housing and environmental scarring are more common. The east of the borough borders open countryside with affluent settled areas where there are extensive green spaces between neighbourhoods and much less industry.
- Land Registry data shows the average house price in Walsall in the second quarter of 2010 was £138,820, lower than both the national and regional average. The updated survey estimates that the average annual gross household income (including non-housing benefits) in Walsall is:
 - Mean average £25,410
 - Median £18,997
- The number of affordable properties required each year is 1,005. This is much higher than the figure of 305 required from the 2007 study. These 1,005 homes should provide a mixture of accommodation with a 19% intermediate rent (new build homes to rent at 80% (or less) of typical market rents, including shared ownership) and 81% social rent need.
- Overall, there are estimated to be 4,642 overcrowded households in Walsall (4.4%), and 36,017 (34.1%) under-occupied households (with two or more 'spare' bedrooms according to the bedroom standard).

¹² Walsall's Child Poverty Needs Assessment 2011, Walsall council

¹³ Health Profile Walsall 2010, Updated July 2010, NHS Walsall

¹⁴ Housing Strategy Statistical Appendix Walsall 2011

The Local Economic Assessment

Walsall's economy has significantly under-performed the national and regional average over the past ten years. Between 1998-2008 total employment in Walsall fell by 2.5%, with full-time employment declining by 4.4% (just over 3,300 jobs) and male employment falling by 3.9% (2,200 jobs).

However, the feedback from the 2010 Business Survey of Companies operating in Walsall indicates a number of areas where there are opportunities:

- There is a high degree of innovation
- Many companies already access national and international markets, and there is the potential to increase sales in these markets.
- A significant cohort of companies need or intend to move to larger premises and there is a strong commitment to staying in Walsall.

The main constraints are:

- Accessing new markets;
- Obtaining finance;
- The costs of training;
- Skills gaps and skills shortages.

The Joint Strategic Needs Assessment (JSNA) January 2009

The JSNA process is a joint duty on Walsall Council and NHS Walsall under the Local Government and Public Involvement Health Act. The JSNA showed a strong association between deprivation, ill health, high levels of poverty, unemployment, and the quality of the housing stock (in particular, the private rented sector). The JSNA demonstrated a number of issues for the borough to take into account including: Social and Environmental Context, lifestyle and risk factors and burden of ill-health.

Chapter 2 – Priority Regeneration Initiatives

Walsall's Local Investment Plan (LIP) has been developed in partnership with the Homes and Communities Agency (HCA). The LIP provides a strategic framework detailing partner priorities and principles of investment to deliver the Council's vision. The LIP priorities are based on the borough's Sustainable Community Strategy:

- Creating jobs
- Reducing worklessness and Improving skills
- Improving Housing Choice
- Improving Health and Reducing Health Inequalities
- Developing Strong and Dynamic Communities

The spatial priorities in the LIP are based on geographic areas where regeneration, place making and housing growth will bring positive economic change to an area. Based on deliverability, scope for housing growth, and strategic importance to Walsall as a whole, the following 6 areas are short to medium term joint investment areas as identified through the Strategic Regeneration Framework and the proposed Town Centre Regeneration Prospectus. These areas are:

- Brownhills
- Darlaston (including the Strategic Development Area)
- Goscote
- Moxley
- Walsall town centre, including neighbouring residential areas; Birchills to the north
- Willenhall

Brownhills

The Strategic Regeneration Framework (SRF) identifies several projects for Brownhills regeneration programme, some of which have already commenced, which includes:

- Identification of mixed tenure housing schemes next to the canal, High Street and vacant gap sites to potentially provide 268 new properties of mixed tenure and type. This includes the 47 home phase 1 of the High Street scheme that started construction in March 2011 through a HCA / Walsall housing group (whg) / local authority funding package, and is due for completion in 2012. Phase 2 of this development is at an advanced stage of the planning process.
- Planning permission granted for the redevelopment of a £30m new Tesco store and independent retail units, and
- Consultation on a significant programme of transport improvements for the district centre. The majority of the suggested improvements have been incorporated into the planning obligations for the new Tesco store and will be implemented as part of their redevelopment programme.

Darlaston

The Darlaston SRF identifies a proposed programme of interlinked regeneration projects including in excess of 1,000 new residential dwellings across the area. It also recognises

that increased housing should help to support the centre of Darlaston. Existing regeneration projects, some of which have already commenced, include:

- The owners of the former Servis (washing machine factory) site have undertaken initial consultation with local residents and businesses to explore the potential for the regeneration of the site. The Council is facilitating this process and ensuring that the process is undertaken in an appropriate manner.
- The Grace Academy Darlaston has recently been granted planning permission for a new £24 million school facility; construction starts in the summer of 2011 with the new school open for the academic year beginning 2013.
- Whitworth Close / Richards Street – planning permission has been granted for approximately 100 new homes, which will be a demonstration project for Walsall's first pre-fabricated timber framed dwellings.

Goscote Lane Corridor

Walsall Council with Walsall Housing Group (whg) are leading on the SRF for Goscote, which provide the vision and key design principles for comprehensive regeneration. There have been several projects for the Goscote Lane Corridor SRF including:

- Completion of a significant programme of acquisition and demolition with redevelopment proposals of approximately 20 hectares of vacant sites. The current redevelopment proposals include options to develop approximately 750 new homes and explore ways to deliver diversification of housing tenure and type.
- Barracks Lane and Well Place gateway sites are in an advanced planning stage for residential redevelopment with the potential to deliver around 100 new homes.

Moxley

The Moxley SRF area is dominated by the social housing market, mainly comprising of semi-detached houses and flats/maisonettes. As such there is a notable tenure imbalance resulting in an unbalanced socio-economic mix.

Key sites include:

- The former Harrowby Road estate owned by Walsall Housing Group is earmarked for residential development totalling approximately 200 mixed tenure dwellings.
- The APUK site – the Council has provided Growth Point funding for remediation of Phase 1, and a loan to remediate later phases to accelerate development of this major housing site.
- The Council working with the HCA are also pursuing a residential development on the site of the former Moxley Infants School by progressing an outline planning permission for up to 50 mixed tenure units by March 2012.

Willenhall

The Black Country Core Strategy outlines the broad principles and vision for the regeneration of Willenhall over the next 15 years. The strategy sees poor quality, industrial land being restructured around Willenhall to provide, in the region of 1,225 new high quality residential units and improved green spaces to add to the historic character, heritage and vitality of this traditional town centre. Willenhall will have improved cultural, leisure, health and educational facilities to ensure a higher quality of life in the area. Improved and new public transport services will also be developed to enable the local communities and businesses to access the growing services and activities of the network of Black Country Centres, in particular Wolverhampton and Walsall.

Existing regeneration projects include;

- A number of small / medium size residential developments with planning permission on brownfield sites in areas of Willenhall. This will enable more choice and quality of housing in the area. This includes Wood Street which has planning permission for 73 new homes next to the new Morrison's supermarket
- Infrastructure improvement works
- The improvement of the town centre historic core through a million pound Townscape Heritage Initiative (THI)

Walsall Town Centre Regeneration Framework

In recent years, regeneration activity in the town centre has focussed on large scale projects, a number of which are now completed or on-site, including Asda, the Walsall College, Tesco, Waterfront South housing development, and whg's office building. The Council is currently developing a framework for the Walsall Town Centre area.

The key challenges facing Walsall Town Centre include:

- Walsall is deemed to be "failing" – it is one of the centres nationally where the spread of vacancies and falling rents are destroying local high streets (Colliers International's Midsummer Retail Report 2011) At the end of 2009, prime rents in the town were £95 per square foot, which is 23% below the UK major town average of £123 per square foot.
- At the end of 2010 Walsall had the highest retail vacancy rate amongst large and medium-sized centres in the West Midlands, at 27% (up 8% in 12 months) against the West Midlands average of 19%. It is also the second highest vacancy rate for large towns in the country (national average is 17%).

The aim of the framework is to transform Walsall Town Centre into a thriving and prosperous strategic centre with a comprehensive retail, leisure, professional and service sector offer in a high quality urban environment. We will deliver actions to create a town that can perform within the top quartile comparable UK provincial towns. This will improve the quality and choice for those living in the borough and will aim to attract people into the borough.

The Walsall Town Centre Framework is being developed through six workstream groups which cover the main priorities the framework needs to address. The workstreams are currently comprised as follows: Retail, Office and Business; Development Opportunities; Access and Movement; Leisure, Culture and Night-time Economy; Customer Engagement and Investor Needs; and Links to Planning Policy and Corporate Plans. An additional workstream dealing with Public Realm is to begin in the near future.

The Walsall Town Centre Framework will comprise of five key elements, which will explain the purpose of the framework and ensure the aim of the framework is understood by all:

- The Area Action Plan (AAP) – a long term plan to allocate sites for development for new shops, leisure and offices for the Town Centre.
- A marketing tool to promote investment and the retention of businesses in the Town Centre
- Town Centre operations, focusing on day-to-day management issues
- Public image – raising the profile of the Town Centre and tackling negative perceptions

- Delivery of the Framework, timescales/ phasing, impact of known developments

Birchills

Birchills is located on the edge of Walsall town centre and includes some of the most deprived communities in the borough. There is a need to expand the range of housing in the area and to provide more aspirational housing options. This will encourage people to stay in the area and attract a broader range of people to the neighbourhood.

The vision for the area has three themes:

1. *Environment* - improving the streets and spaces of the neighbourhood.
2. *Housing* - opportunities to widen housing choice locally and improve the housing stock.
3. *Community & Economy* - measures to improve prospects of local people and businesses.

In Birchills there is the potential for 1,100 new homes. There are a number of development sites which have the potential to come forward in the short to medium term:

- Former Caparo site – the site is suitable for residential development of up to 310 units based on previous planning consents.
- Hollyhedge Lane phase 1 – a planning application has been submitted for 122 homes.
- Norfolk Place Depot site – full planning permission of 264 new homes.
- Former Reedswood Golf Course – the Council has explored the potential for housing development.
- Birch Street site – the Council and the private sector co-owner have explored the potential for housing development of up to 200 units.

Chapter 3 – Increasing housing choice and employment opportunities

The Council aims to create and maintain neighbourhoods where people want to live and work. We are committed to providing the right homes, in the right places which are accessible. We will ensure that a wide range of housing types and tenures is available, which meet the diverse needs of our communities. We aim to:

- Promote employment opportunities
- Promote housing choice and aspiration
- Increase the supply of new homes

Promote employment opportunities

Housing plays a key role in the Council's work in addressing worklessness and improving the life chances of our residents. We will work with housing association partners, voluntary sector and development partners where possible, to integrate opportunities which will improve the skill base and employment opportunities of people in Walsall.

The LEA has determined some key priorities for the economy and we will support and complement the work of the resultant economic Framework which will aim to:

- Develop a resilient mix of sectors, in which productivity and employment is maximised.
- Provide the necessary infrastructure to support a growing economy.
- Foster an environment that supports enterprise and innovation.
- Strengthen skills and knowledge that support economic growth.
- Promote financial inclusion and raising participation in the labour market.

The Darlaston JET (Jobs Education and Training) project in Walsall provides a multi-agency one stop shop centre for employment support, education advice and training. The JET supports the delivery of new employment opportunities.

Training and apprenticeships

Social housing providers are at the forefront of innovative methods of offering training and employment opportunities to local people supported by Walsall Council.

Whg's award winning skills centre provides training and apprenticeships opportunities to people in Walsall in a number of areas including plumbing and construction. The Centre will provide 50 apprenticeships per year over the next 5 years.

Walsall College is working to develop skills and training opportunities and the employer led demand has enabled apprenticeships, the development of a retrofit qualification and local enterprises

Bromford Housing is committed to creating learning opportunities for young people and has offered five apprenticeships in housing over the last twelve months.

Heantun have created 200 opportunities for employment for people with learning disabilities and ex-offenders.

Accord has built employment opportunities into tendering contracts which have created 37 jobs for local people.

Local developer Jessup Brothers created 10 apprenticeships / trainee opportunities as part of the Waterfront South development, some of which are still currently employed on Phase 2 of the site.

House Building

This Strategy aims to build on its previous successes through the Growth Point, HCA Kickstart, and Regional Housing Pot programmes to stimulate housing growth and kickstart stalled housing sites, This will bring construction led employment and training opportunities into the borough.

The Council via 'Think Walsall' is working with businesses and partners to promote supply chain and employment opportunities from the regeneration and procurement activity in Walsall. We aim to support Walsall based businesses and third sector organisations to link into major developers, public sector procurers and business.

The 'meet the Buyer' event hosted by Walsall Council lead to links being made between developers such as Jessup's and local business which lead to the local supply of aluminium windows. The contact led to the local firm attracting £1.5 million pounds of investment without which this local company would have had to make redundancies.

New Green Housing

The Council has worked in partnership with Accord Housing Association and secured a manufacturing unit which will produce timber framed houses. The key outcomes from the overall project are:

- Developing up to 20-30 jobs to include a proportion of local people,
- potential for expansion of the business in Walsall,
- potential to be national supplier,
- potential to train local people to work at the facility

The provision of new timber framed housing in Walsall will provide an opportunity for properties to be built to a high environmental standard in an environmentally friendly way and result in an increase in new affordable housing for the borough.

The Council will continue to work to ensure this business is a success over the next 5 years, and aims to promote expansion of this type of environmentally sound production in Walsall

Retrofit

Housing partners and the Council are currently working with Walsall College to develop a mainstream retrofit qualification by March 2013. The qualifications will up-skill new and existing trades' people who will contribute to the retrofit employment market.

We aspire in future to work with Black Country and regional local councils and providers to bring in new retrofit supply manufacturing / assembly businesses which will provide local employment opportunities.

Six housing associations in the midlands are considering jointly purchasing products and services to retrofit up to 135,000 homes. The M6 Group, which includes Accord, Bromford, Midlands Heart, Orbit, Walsall Housing Group and West Mercia Housing Group, will examine ways to make their homes 'greener'. The Group will be looking at ways of saving money which may include forming a procurement club to reduce the cost of retrofitting stock to level four of the Code for Sustainable Homes.

The Council has worked with whg via the CESP project to target hard to heat properties in whg stock and the private sector. Jointly we are at the forefront of Green Deal pilot 'Green Deal Go Early' in Walsall. Whg will set up a joint vehicle to be a green deal provider improving efficiency of stock through insulation, central heating.

Promote housing choice and aspiration

The focus of the Council and its housing partners is to offer greater choice to individual households through choice based lettings arrangements and address issues in particular neighbourhoods through local lettings plans.

We are also seeking to manage our housing services towards a prevention agenda to reduce the number of households entering into rented housing in a 'crisis position'. The housing offer will be developed with other services such as health and employment, whilst housing support is offered to individuals and families to achieve their wider aspirations and maintain their independence.

Walsall Council together with its housing association partners will be working to develop a Tenure Strategy by April 2012 (dependent on the Localism Bill) to ensure that social housing is offered to those in greatest need whilst maintaining sustainable communities.

The strategy will include wider information on

- A local lettings plan
- Arrangements with housing providers
- Flexible tenures
- Advisory services
- Joint working arrangements: including common housing registers or common approaches to choice-based lettings by all social landlords in a given geographical area; common exclusion policies.

Access to Housing and Housing Need

Walsall Housing Group (whg) are the holders of the boroughwide housing register which currently has 15,000 applicants registered for re housing (as at June 2011). This includes approximately 250 households per year in the highest need due to homelessness¹⁵.

At present the Housing Associations in the borough operate separate housing registers. Work is continuing to create a simplified method of accessing social rented housing. The Councils Allocation Policy was reviewed in 2010 and whg allocations policy now mirrors this.

To increase access to a decent home we aim to help residents look across the full range of housing tenures. It is envisaged that the Council will work to develop a mechanism where accredited private landlords are allowed to advertise their properties through a Choice Based Letting scheme. The revised system will be in place in 2012 and approximately 40 private landlords will be advertising their accredited property through the new system.

It is also important that the allocation of social housing is set within a wider enhanced housing options approach, so that people receive joined-up advice and information about all the options open to them across sectors, including private renting and low cost home ownership.

Welfare Benefits

The government believes that many people on benefits perceive the financial risks of moving into work as too great. For some groups the gains to work, particularly at low hours, are small, and any gain can easily be wiped out altogether by in-work costs such as transport. The Coalition Government has identified two key problems with the current system:

- work incentives are poor, and
- the system is too complex.

The Coalition Government has put in place a number of reforms to the welfare system to support people to move into and progress in work more easily.

The reforms to the benefit system aim to make it fairer, more affordable and better able to tackle poverty, worklessness and welfare dependency.

The main elements of the welfare benefit changes are:

- The introduction of Universal Credit to provide a single streamlined benefit that will ensure work always pays
- A stronger approach to reducing fraud and error with tougher penalties for the most serious offences
- Reforms to Disability Living Allowance, through the introduction of the Personal Independence Payment to meet the needs of disabled people today
- A new approach to Housing Benefit to bring stability to the market and improve incentives to work
- Driving out abuse of the Social Fund system.

¹⁵ Walsall Housing Group

- Reforming Employment and Support Allowance to make the benefit fairer and to ensure that help goes to those with the greatest need
- Changes to Child Support.

In Walsall one of the most significant announcements has been that housing benefit for working-age tenants who under occupy their homes would reduce. We will work with our partners to identify these households and provide advice and guidance on their housing options where required.

Walsall's profile as an area of high ranking deprivation and a higher than average number of people of benefits will lead to any changes made to the benefit system having a disproportionate impact on residents of Walsall.

Overcrowding and Under-occupancy

Overcrowding has implications for the life chances of individuals in addition to a wider impact on families and communities. It also means limited space for young people to play and study, creating hazards, health and development issues and lead to an increased likelihood of long term mental health problems.

Under-occupancy in homes can be an issue for people living in them who usually are affected by fuel poverty and maintenance costs in particular if they are older people. It also has implications for housing associations, who can make better use of family housing and thereby reduce problems with over-crowding and homelessness.

We have an Under Occupation officer who will work with our housing association partners to identify under-occupancy and promote down-sizing and support people into smaller homes more suited to their needs.

This will make more homes available to those who are living in over-crowded conditions. We will also promote the changes in housing benefit to customers who are living in under-occupied households, as vacant rooms will incur a greater financial contribution from householder.

We intend to help the release of 200 under occupied homes, and help 100 overcrowded households by March 2013 with the support of CLG funding.

Increase the supply of new homes

We want to increase the supply of good quality, well designed homes not only to address housing need but also attract new people into the borough. In the context of the difficult market conditions posed by economic recession and the housing market downturn there will be a need for innovative thinking to deliver the necessary numbers of new homes in the borough.

Between 2011-15, The Homes and Communities' Agency hope to invest £4.5bn nationally in affordable housing through the Affordable Homes Programme and existing commitments from the previous National Affordable Housing Programme. In Walsall, the majority of the

homes built will be made available as Affordable Rent with some for affordable home ownership or supported housing.

In Walsall housing demand outstrips supply and we have 15,000 people on a waiting list for affordable housing. The need to increase the supply of housing and tackle affordability issues is a key housing policy issue. The primary requirement for affordable housing in Walsall is larger homes (3 bed plus), bungalows, and wheelchair adapted properties. There is also some need for 2 bed houses, and flats where need can be demonstrated (such as town and district centres, or areas that are predominantly family housing).

We will continue to explore innovative methods in helping house builders to accelerate stalled housing sites and to stimulate housing growth, including the use of funding streams such as the New Homes Bonus.

The New Homes Bonus (NHB) has been introduced to provide an incentive to local authorities and communities to support housing growth. The Bonus is intended to provide additional funding to the Council equal to the national average council tax band on each additional property for a period of six years following construction. It includes an enhanced payment for affordable homes. NHB is not ring-fenced and in Walsall it has been agreed to focus NHB on activities to stimulate future housing provision and economic growth using these 6 principles:

- Developing and maintaining a policy base to support future development
- Supporting strategic acquisitions and development funding
- Supporting economic regeneration
- Stimulate future new homes provision
- Bringing empty homes back into use
- Providing for Gypsies and Travellers

It is intended that the first year's funding is used to stimulate new housing provision with a particular focus on unlocking stalled housing sites in Walsall. We will develop a programme by December 2011 to show how we will allocate future NHB funding using the 6 principles described above.

The Black Country Core Strategy gives targets of achieving 39 permanent residential pitches for gypsies and travellers in Walsall and 10-12 transit plots across the Black Country. We will seek to maximise opportunities for funding of sites and work with housing providers where possible to provide this type of accommodation.

The Public Land Initiative aims to bring publicly owned sites forward by offering land to developers from the HCA's Delivery Partner Panel (DPP) on a deferred receipt basis. The sites will be de-risked as far as possible and the public land owner will offer to take a share in loss should there be a need to reduce the sales prices when the homes are completed. This should ensure that sites which are struggling to be brought forward can meet their development potential for housing despite the uncertain economic times. Walsall is involved in phase two of the programme and will continue to work with the HCA, developers and housing associations to enable us to provide more affordable homes on key strategic sites

Based on the results of our Housing Needs Study (2010) we will review our Supplementary Planning Document (SPD) for Affordable Housing by September 2012 to ensure we are able

to increase the supply of new affordable homes to meet the needs of our communities. The changes to the SPD will consider the possible introduction of the Community Infrastructure Levy and the introduction of the Affordable Rent Model.

DRAFT

Chapter 4 – tackling fuel poverty and improving the quality and energy efficiency of existing and future homes

We will improve the standard of existing and future homes through a variety of initiatives by:

- Supporting Independence and adapting properties
- Bringing empty dwellings back into use
- Improving Private Sector Housing standards
- Promoting and delivering energy efficiency and fuel poverty initiatives

The private sector consists of 81,118 properties, of these owner occupation is the key tenure with 67,983 homes (84% of the private stock) and 8,385 properties are private rented (10% of the stock). Our stock condition survey¹⁶ showed overcrowding; excess cold and falls as the biggest hazards in the private sector respectively. Our Housing Renewal Assistance Policy¹⁷ details our priority actions which will help make stock in the borough decent and free from hazards for our residents.

Supporting Independence/adapting properties

We are working with Social Care and Inclusion to maximise both the availability of new adapted homes and in adapting existing homes. This includes for former residents of nursing and care homes. This will help them to live more independently within the community.

Disabled Facility Grants (DFGs)

The Council will continue to work with partners to maximise the number of households benefiting from the available DFG resources. This work includes;

- reducing cost of adaptations wherever possible
- securing the maximum number of adapted homes from housing associations to assist those households able to move
- applying relevant land charges on properties to provide future 'recycling' of funds for adaptation
- securing wherever possible additional funds to assist with the cost of adaptations

We will explore the viability of developing a system to enable residents to use their 'Individual / Personal budgets' to secure adaptations along with safeguarding methods in our systems and processes to ensure that vulnerable residents are protected. We plan to adapt 1000 homes over the coming 5 years.

Preventative Adaptations Grants

During 2011/12 the Council will be delivering additional assistance to help owner occupiers, who do not meet the statutory DFG criteria to continue to live independently. This assistance is based on funds offered for works costing up to £12,000 per property. The assistance is 100% land / property charged so that when the owner moves or sells or transfers their home the funds are returned to the Council so that someone else can be assisted.

¹⁶ Private Sector House Condition Survey, Prepared by David Adamson and Partners for Walsall council, March 2008

¹⁷ Walsall Housing Renewal Assistance Policy 2011-2012, Walsall council January 2011

Handyperson scheme

In 2011/12 we will continue to offer assistance to householders aged 55 or over and who need assistance with minor repairs around the home. We will promote the service in areas of high deprivation and will help target those at risk of injury from slips, trips and falls.

Equity Loans – ‘Kickstart’

The Council will encourage and enable home owners to invest in the maintenance and improvement of their own homes. Some households are not in the position to secure finance through high street lenders. The Council therefore has previously piloted a loan product aimed at such households called, Kickstart Equity Release Loans. Whilst funding is not currently available for this the Council will continue to seek external resources to enable projects such as this to deliver benefits for vulnerable local residents.

Empty Properties

The borough has a significant number of empty homes. Resources to help address empty homes have been very limited and it is anticipated that in the future that the key source will be the New Homes Bonus (which will have significant competing demands). The council will seek to identify owners of empty homes, discuss with them their intentions and timescale for re-use and where plans are inappropriate or unreasonable seek to use a range of enforcement powers.

The Council aims to bring empty homes which have been empty for over 2 years back into use by:

- Addressing the underlying causes of vacancies through Housing Renewal
- Responding to incidents of problematic vacant properties through intervention and enforcement
- Proactively working with partners to deliver solutions

The Council and partners has a range of services that identify empty homes including those that cause either a nuisance or problem for their local area. A single list with priority for action is collated to ensure that resources are targeted at returning properties to use as soon as practicable and to minimise their impact upon amenity.

There are a range of options to support the re-use of empty homes that are included within the Council's Housing Enforcement Policy.

The Council has a published prioritisation scheme for managing pro-active action on void / empty dwellings. This is based on the current (and anticipated) staff resources within the Council to tackle empty properties and gives priority to those where there is a risk to the public. The priority properties are dwellings which have been referred from the Fire Service following a fire, protecting people from harm due to potential unauthorised access to the empty property and anti-social behaviour.

The Empty Dwelling Management Orders (EDMOs) are designed to secure the continued re-occupation of the empty property. The Council will seek to develop an agreement with housing partners to carry out housing management duties where EDMOs are in place. We

will make use of EDMOs where we are confident that this represents the best course of action.

Housing Standards

The Housing Health and Safety Rating System (HHSRS) is a system for assessing the health and safety risks in homes. Landlords should provide a safe and healthy environment for any occupier. The Council has developed a Housing Enforcement Policy¹⁸ and we will prioritise cases where there are Category 1 hazards. This work directly improves the lives of people living in the private rented sector. It is expected that during the timescale of this strategy that the private rented sector will grow.

The Council is committed to improving the condition and availability of private rented homes in the borough. We will continue to:

- Work with private landlords / letting agents to investigate the opportunity to develop a social letting agency
- Provide those in the private sector regular landlord newsletters
- Conduct twice yearly Landlord Forums
- Promote Midland Landlord Accreditation Scheme (MLAS)
- Promote Walsall Fire Protocol with West Midlands Fire Service
- Attend and contribute to regional private sector and empty dwelling best practice groups

We will work with partners through the Homestamp consortium to develop initiatives like 'Read this First' which provide details to landlords and tenants in the private rented sector on their rights and responsibilities. We will contribute to the education project through Homestamp which will provide young people with information and guidance on housing choice as part of the Citizenship programme.

The Housing Standards Service also provides training and support for key workers who directly support tenants to maximise the availability and quality of information for private tenants and landlords.

In addition to this pro-active work the Council will use when necessary a range of enforcement powers to improvement the condition of private rented accommodation.

Houses in Multiple Occupation (HMOs)

Houses in Multiple Occupation (HMO's) are those which are occupied by 3 or more persons who form more than 1 household who share an amenity such as a toilet, bathroom or kitchen. HMO's can also include bedsits, shared houses, halls of residence and self-contained flats.

The Council is responsible for checking Houses in Multiple Occupation (HMO's) to make sure they are free from hazards and in safe condition. Our Healthy HMOs project improved the health and safety of residents living in HMOs and in particular improves housing related

¹⁸ Walsall Housing Enforcement Policy 2011-2012, Walsall Council, March 2011

health issues. We will continue to sign-post people living in HMOs to a range of services including education and welfare rights services.

HMO Licensing

The Housing Act 2004 places a statutory duty on authorities to effectively implement licensing on specific types of HMOs.

We will routinely check licensed HMO's and continue to assess conditions in the property using the HHSRS. We will use enforcement powers available to us to ensure our HMOs are safe and free from category 1 hazards.

The Council maintains a public register of all;

- licensed HMOs;
- Temporary Exemption Notices; and
- Management Orders issued,

We are pro-actively surveying the Borough to ensure all properties which require a licence are licensed. Since the introduction of licensing, 18 HMO's have been licensed, and we aim to identify hotspot areas by April 2014 for future licensing.

Caravan Parks and Mobile Home sites

Caravan Sites and Mobile Homes Parks are covered by legislation which in some circumstances requires them to be licensed. One of the key factors considered in evaluating caravan and mobile home parks is the risk of fire and fire spread. The Council will continue to work in partnership with West Midlands Fire Service and License holders to ensure that fire prevention is a high priority at the sites and in the review of licenses.

We will license Mobile Homes and caravans through statutory licensing and we will work proactively with people living in mobile homes to promote the Statutory Model Living Conditions 2008.

Home Energy and Tackling Fuel Poverty

Fuel poverty occurs when a household is unable to afford adequate warmth, due to the combined effect of low household income, inadequate thermal insulation and/or inefficient and uneconomic heating systems, cost of fuel and under occupying their home. The Council's Affordable Warmth Strategy (2007-10) is currently being reviewed and a combined Affordable Warmth and Green Deal Strategy will be published in 2012 to cover the period 2012 to 2015. This will include initiatives to reduce fuel poverty and place Walsall at the centre of the Black Country for delivery of innovation and development in domestic retro-fit.

Retrofitting is a process of fitting energy efficiency measures to existing homes, including water saving measures and insulation. Some of these measures can contribute to affordable warmth and reducing the carbon footprint. The Council will work with Housing Associations to maximise access to HCA and European funding for Retrofit. We will look into developing a pilot project in Walsall in the private housing sector.

The Council has used previous Regional Housing Pot funds to develop nationally acclaimed partnership projects such as the Walsall Npower Health Through Warmth Project, and secured the country's first rounds of Community Energy Saving Programme (CESP) projects in partnership with British Gas and whg. The Council will continue to maximise funding to deliver affordable warmth, and link to the retrofit proposals.

The new government directive is to develop a Local Standards Framework by April 2012 to replace the additional building standards and codes that have been attached to planning permissions. In the meantime, existing HCA standards, including Code 3 of the Code for Sustainable Homes and Building for Life requirements, will continue to apply to new affordable housing. We will work with developers and registered providers to promote energy efficient development to CSH Level 4, increasing to level 6 over the life of this Strategy. We want Walsall to act as an exemplar for energy efficiency on new housing which in turn will make Walsall more attractive to manufacturing and assembly businesses for energy efficient housing and products in the future. The Council will promote HCA schemes which exceed current HCA standards, which would currently mean CSH level 4 or above.

We will promote affordable warmth through our updated Affordable Warmth Strategy and a range of media, raise energy awareness through training and education and maximise 'take up' of assistance available, by residents. We will continue to maximise funding and resources from existing and established sources and explore alternative funding mechanisms to grants. We will extend awareness through partnerships with educational organisations. This will include working in schools and adult education providers. We will identify vulnerable and more isolated groups and prioritise help where necessary to ensure our services reach everyone. We will assist and encourage private landlords to achieve affordable warmth in their properties.

Chapter 5 - Addressing different needs and promoting independent living, health and well-being

We want to improve the quality of life of vulnerable people in the borough and reduce health inequalities and enable people to live more independently in their homes for longer. We want to ensure people receive help and support to enable them to maintain or increase their ability to participate in community life, prevent homelessness and avoid admission to hospital or residential care. We will continue to support independence and we will provide a platform for reducing health inequality and creating housing opportunity for all. Our priority intervention areas are:

- Promoting independence and choice
- Reducing health inequalities
- Delivering prevention initiatives

Promoting independence and choice

The 2010 Housing Needs Study Update showed 15% of all households in Walsall contain a person with a support need, with the largest group being those with a physical disability. The analysis demonstrated that 2.1% of households (2,205) contain more than one person with support needs, and 3.7% (3,933) of households contain a person with multiple support needs.

We want to encourage people to live more independently. The council estimates that 60 housing units will be needed over the next five years to meet the needs and aspirations of people in the borough with a learning disability. The Council will need to provide suitable accommodation in Walsall for 16 people currently placed outside the borough, who are expensive to maintain and would be more beneficial to the household to be housed in Walsall. We recognise the potential of unmet and newly arising need from those people who are 18 and those people who are leaving residential care. There is also a need to identify people whose housing situation has changed and now have a need for a different type of accommodation. Our Housing 21 schemes have been revised to take into consideration those people with learning disabilities. This will add to the choice and quality of homes available for people.

The older population will increase significantly over the coming years. The Housing Needs Study 2010 shows nearly two thirds of older person households are owner-occupied without a mortgage and make up more than half of all owner-occupiers without a mortgage. The council, in partnership with Housing 21, developed a four year programme to re-provide existing residential homes for older people and replace them with five new build extra care schemes in the Aldridge, Brownhills, Delves, Mossley and Short Heath areas. The council has identified a requirement for an increase in Extra Care Developments to be provided in the Darlaston / Bentley and Pheasey/Paddock areas; this will increase housing choice and opportunities for older people which may increase the supply of larger affordable homes that are currently being under-occupied. The schemes will also promote independence and social inclusion, and improve the health and quality of life of older people.

The Council has also identified a need for affordable bungalows. This will enable people to live in suitable homes for longer and we will continue to support developments for this type of housing through our Supplementary Planning Document (SPD) for Affordable Housing.

We know that immigration patterns are changing. Black and minority ethnic groups (BME) constitute a larger proportion of the population in Walsall than in the rest of the West Midlands and England and Wales¹⁹. We will monitor the effectiveness of its communication methods to ensure;

- that language does not operate as a barrier to accessing services
- effective utilisation of the services of the BME Community organisations and existing networks to disseminate information
- the views of BME communities are obtained, and then develop a culturally sensitive approach to consultation which recognises the impact of ethnicity and gender.

The Housing and Support Needs in Walsall for People with Mental Health Problems report 2008/09²⁰ made recommendations to meet the accommodation needs of people with mental health problems by updating estimates of need for different types of accommodation, mapping current provision and identifying gaps. Significant developments have taken place since these findings were published which has included improving the recording of information and data on all of our customers.

We will provide a range of housing options tailored to meet the needs of our customers. This will include working closer with the private rented sector and ensuring people have the choice to live in an area suited to their lifestyle. We will work with our customers to promote home-buy products where possible enabling people to access health and employment opportunities.

Reducing Health Inequalities

People with a social care need have the right to safe and good quality homes. We know where people live is closely linked to their general health and well-being.

People with mental health issues in particular can often find themselves homeless and this in turn can have a greater impact on their health and well-being. People with mental health conditions are more likely to live in rented accommodation than to be home owners. Mental ill health is frequently cited as a reason for tenancy breakdown with rent arrears being a major issue behind many evictions. The Health and Social Care Joint Strategic Needs Assessment (2009) reported that the level of people in residential care and institutional settings in Walsall is above average.

The council will continue to work in partnership with Dudley and Walsall Mental Health Partnership NHS Trust to ensure timely housing advice is provided to all people with long-term mental health issues on admission to hospital. Our floating support service has helped people on discharge from hospital to return to the community and achieve independent living and helps people access treatment, employment and promote social inclusion. We will also work with our service users to help them find suitable accommodation with the right level of support. To help improve overall understanding of mental health in relation to housing and

¹⁹ Office for National Statistics 2007 estimates by ethnicity and local authority

²⁰ http://www.walsall.gov.uk/housing_and_support_needs_in_walsall_for_people_with_mental_health_problems_-_final_report.pdf

priority needs for re-housing, the 'Managing Mental Health vulnerability priority referral form for housing' has been developed. By providing this relevant information, a consistent approach can be given by housing partners when considering priority for re-housing. This form replaces individual Social Needs Reports produced by mental health professionals in support of housing applications where a social need is identified.

Where possible we will work with developers and house-builders to encourage them to build to Lifetime Homes Standard, a set of 16 non-statutory design criteria that provide a model for building accessible and adaptable homes. The standard is good practice and enables a person is able to live in their homes for longer.

There is an identified need to access alternative adapted accommodation. The Council works closely with Walsall Adapted Housing Service and they hold a waiting list of approximately 400 households waiting to transfer to an affordable adapted property. These households are matched to existing adapted properties when they become available, but there is a clear shortfall of new fully wheelchair-adapted properties. The council will work with partners to encourage developers to deliver units to Lifetime Homes Standard. We are also working to streamline our Disabled Facilities Grant process so that we can deliver faster adaptations to people in their homes, which will include wheelchair access.

Delivering Prevention

The Council and NHS Walsall Prevention Strategy²¹ supports the delivery of the national Putting People First milestones and the Primary Care Trust's (PCT) World Class Commissioning priorities to maximise independence and well-being and build a sustainable community. It complements the strategic commissioning plans of Walsall Council and NHS Walsall and links with the priorities of Walsall Strategic Partnership which co-ordinates the work across health, the local authority and other key stakeholders.

The Joint Commissioning Unit (JCU) will deliver innovative preventative services across the borough and will work in partnership with many different organisations in the private, voluntary and public sectors. We will maximise opportunities to work with voluntary organisations in the delivery of social enterprises as we recognise that the constraint on resources will affect the level and availability of public services.

The JCU will aim to help vulnerable people by developing a range of housing options in partnership with strategic colleagues and aligned commissioning activity between adult social care and health. The JCU will deliver a range of services in the future with a focus on prevention which will offer help, advice, support and practical assistance. This will prevent people reaching crisis and/or experiencing a deterioration of their health or situation.

The JCU is embarking on a major programme of investment in telecare and telehealth linked to the community alarms service and will develop a Centre for Independent Living. We will work with the JCU and support the evaluation of Extra Care type developments. This will involve data collection and analysis on the current social housing stock available, an assessment on need and demand and this will inform future projections.

²¹ Draft Prevention strategy 2011-2014, Walsall Council

Chapter 6 – Preventing and Tackling Homelessness

Walsall Council Housing Service has made significant progress since the last Homelessness Strategy in 2007 by achieving a sustained reduction in the Council's use of temporary accommodation, ending of the use of bed and breakfast for homeless households and by supporting many people into secure accommodation which they have maintained, stopping the circle of repeat homelessness.

Recognising the council's successes, recent trends in the levels of homelessness has meant there are different challenges for the next 5 years. The council's Housing Options Service has over 5000 households per year seeking help to resolve a housing difficulty. High levels of worklessness and deprivation mean that home ownership is out of reach for many local residents and is an increasing reason for housing instability. Demand related to individual vulnerability remains high from a range of different sources including those undergoing transitions from the criminal justice system, young people leaving home due to relationship break-down and mortgage repossessions.

The focus of our objectives for homelessness is through earlier intervention, providing an increased range of self-help options, building on a robust framework for multi agency working and the re-integration of homeless people into mainstream society through achieving economic prosperity and a more stable home.

To prevent and tackle homelessness in Walsall our key objectives for the next 5 years are:

1. Prevention of homelessness,
2. Supporting customers to financial security, training and employment
3. Providing easy access to accommodation and support that maximises self help,

1 - Preventing homelessness

Prevention of homelessness is important as it can minimise the personal trauma experienced by people and can be a cost effective method of dealing with homelessness before often expensive emergency measures have to be put in place.

We will deliver a range of interventions which will aim to address the key causes of homelessness. Relationship breakdown was the main reason for homelessness for Walsall in 2010/11. This includes exclusion by parents and family members, divorces and separation and domestic abuse.

Within the housing options team we are developing the skills to negotiate with families to facilitate young people staying in the family home longer to reduce unplanned moves and homelessness. The council is committed to preventing homelessness effectively, in 2010/11 we successfully prevented over 900 households from becoming homeless and are working with partner agencies to sustain and where possible improve this.

The council is committed to helping young people make the right choices for them in terms of the housing pathway and the council with Homestamp a sub regional consortium are

developing housing related lesson plans for years 10 to 11 which will be piloted in local schools in 2011/2012.

Domestic Violence

The council has made it a priority to reduce domestic violence and produced Walsall's Domestic Abuse Strategy²² in 2011 in which housing plays a significant role. Our Housing Options Service plays a part of the plan and will actively promote the take up of the Sanctuary scheme as a housing option which helps victims of domestic violence to remain in their own homes by the provision of a safe room. The council has also reviewed its allocation policy with its registered providers of social housing to enable priority moves rather than be placed in temporary accommodation. We will also support the work of MARAC (Multi Agency Risk Assessment Conference) which provides a forum for inter-agency information sharing in a bid to help increase the safety, health and wellbeing of high risk victims of domestic abuse and their families.

Rough Sleepers

Historically the estimated numbers of rough sleepers has been low. Walsall Severe Weather Emergency Partnership (SWEP), set up in 2010 following an unpredicted period of cold weather is using local intelligence and data along with a multi-agency annual count to obtain a more accurate picture of the extent of rough sleeping in the borough. In Walsall we have supported the work of agencies such as street pastors who offer advice and guidance at key times late evenings and weekends. We support the work of voluntary agencies such as the Glebe St Centre and Hi & Low's who offer a range of welfare and support services to rough sleepers and sofa surfers. We have a named housing officer who works with the voluntary sector to pick up any of the housing needs which we can support.

Walsall is leading jointly on regional work with neighbouring authorities to further reduce rough sleeping in areas. This will enable us to determine the true extent of rough sleeping sub regionally and identify actions to address issues after an initial scoping exercise by March 2012.

Prevention

We will further develop the prevention agenda and joint working with registered providers on incorporating homelessness prevention into their procedures for dealing with rent arrears, anti-social behaviour and harassment. We will work with private landlords to support landlord accreditation so our landlords are knowledgeable about housing management and work with the housing options service to prevent the breakdown of tenancy. We will improve the use of the private sector as a sustainable alternative to social housing including partnership working with private sector landlords and support for private sector tenants. The council will develop a bond scheme in partnership with private sector landlords as a method of securing a broader range of accommodation for homeless people. Landlord accreditation has also created a list of reputable landlords offering suitable accommodation.

²² Domestic Abuse Strategy 2011-2014, A Time for Change, Walsall Council, March 2011

We will continue to provide training to a wide range of agencies on preventing homelessness and develop a range of referral protocols including future work with a hospital discharge protocol by March 2012.

Our Floating Support Workers and Resettlement officers funded by the Area Based Grant to deliver housing related support to the most vulnerable people in Walsall. We will work with vulnerable people to prevent homelessness, promote independence, health and wellbeing. After support is delivered we will promote self-help pathways for our customers.

Our service recognises that a vulnerable person might be someone who is affected by severe debt problems, mental health issues or a long-term illness. The floating support service has the capacity to support 56 households at any one time through a range of activities. There will be greater advertising of this service particularly in the private sector to support people in that accommodation and maintain tenancies.

2 - Support Customers to financial security, training and employment.

The key measure in supporting customers through the current economic climate is

- Reduce the impact of debt
- Promotion of training and employment opportunities

Debt

We have seen a significant increase in the number of households who are at risk of losing their homes as a result of the economic situation. The Housing response to the economic recession is a multi-agency approach and relies on good partnership working with key agencies such as social landlords, private landlords, CAB and Job Centre Plus.

Debt may either be cause or a consequence of homelessness or unstable accommodation. Problems with debt can contribute to people being financially excluded, which in turn make it difficult to open a bank account, get a tenancy or access credit.

The Housing Options Service will be exploring opportunities to extend tenancy support to increase the capacity to reduce arrears and financial problems at the earliest stage. The service will also continue to work with the CAB to develop the debt advice skills within the housing options team.

Given the potential impact of the housing benefit changes to existing tenants we will be working with our registered providers and seconding an officer from the housing benefit department to ensure that the benefit changes are communicated to residents and plans are put in place at the earliest opportunity to mitigate the impact of benefit change.

The council is developing a scheme which aims to support people into accommodation who have previously lost their homes due to rent arrears. The scheme will be rolled -out to all RP's by March 2012

Court Desk

A Court Desk is a facility within Court premises, to ensure that any household facing repossession and attending Court can be properly represented. We aim to help 50 households through the Court Desk service in 2011/2012.

Mortgage Rescue

The council offer the government mortgage rescue scheme to vulnerable home owners at risk of losing their home through repossession within our borough. The current scheme is under review by government but Walsall is looking to ensure that this help is available to residents of the borough as 25 families have been helped by this scheme since it was started. We will help a further 7 families in 2011/2012. This includes liaising with lenders, sign-posting and offering advice on housing options.

Rent Deposit

Rent deposit or guarantee schemes can remove financial obstacles to private renting, provide advice and support, and liaise with landlords. Over the last 3 years Walsall Council has helped 40 families per year with either rent in advance or the deposit needed to obtain an appropriate tenancy.

The council will assess the viability of developing a bond deposit scheme by September 2011. The scheme will offer private sector landlords the same financial security as a cash deposit and the local authority provides assurance for the deposit amount.

Banking/Finance

The council supports multi-agency work with the Wincred scheme. Wincred delivers themed response to tackling financial exclusion by establishing initiatives relating to:

1. Access to affordable credit
2. Accessible money advice
3. Affordable insurance
4. Tackling fuel poverty
5. Preventing Homelessness
6. Facilitating access to basic bank accounts

A borough wide Financial Inclusion Strategy is also currently being developed which is due to be completed by March 2012.

Training and employment

Walsall council will continue to provide early sign posting to training, education and employment to those presenting to the Housing Options Service and asking for housing advice. We will be working with job centre plus to install internet access in the council reception to provide links to employments services. Using the new housing advice system which will be proposed for 2012 housing advice staff will produce advice and guidance which

will demonstrate the benefits of work for housing options including advice on benefits and tax credits.

Multi agency working

Walsall council is working with colleagues from Connexions to develop a base within one of its supported housing projects to see all young people and encourages them into training. The council also work with Juniper training (formerly Carver Training) a privately owned company that helps people of all ages and backgrounds to develop the confidence, knowledge and skills needed to find and keep a job. Juniper also specialises in those who have spent some time being excluded from traditional education. The profile of residents in temporary accommodation will be reviewed to include and assessment of skills/qualification levels which can be used to target residents to training and employment opportunities.

Age UK also provides some training and individual courses for young people within the council's supported housing projects. Link workers also encourage people to engage in training and employment as part of their personal success plans.

3 – Provide easy access to accommodation and support that maximises self help

It is important that households in housing difficulties are supported to find solutions. We will deliver:

- Effective referral pathways into specialist accommodation
- Improve supported accommodation and Move On

It is important that supported accommodation and other facilities within the borough provide the best opportunities for their clients to move forward into work and settled homes. Both these issues will become significant parts of the support plan used by accommodation providers in order that residents are encouraged and empowered to take advantage of training and job opportunities, and are prepared for a move into settled accommodation.

To address this it is essential that we make the most effective use of the current provision ensuring that referrals are appropriate and based on a comprehensive assessment of need, and that vacancies are prioritised to those in most need. We have developed a single point of access into supported housing in the borough in partnership with the Joint Commissioning Unit (JCU) called the 'Gateway' this new process will be reviewed to ensure that vulnerable people continue to access supported accommodation when they are in need.

Planning for care leavers is a priority to ensure that an early application is made to the housing register, and that a timely offer of appropriate accommodation is made to coincide with the end of the care placement. Housing is also working to develop a housing pathway from care into independence which will include supported lodging. Our Joint Protocol for Young Homeless People includes care leavers and defines the processes and procedures for inter-agency working, and results in a more efficient transition for the care leaver into independent living.

Advice and Assistance

We recognise the growing trend in customers accessing our services for advice and assistance over the past 2 years. We will proactively support and empower people to self-help which will lead to people making their own informed decisions in a timely way. We will review our communications and consultation tools including regular review of our website and deliver our information in more innovative ways by September 2012. We will also ensure that there are regular articles in the local press, explore the viability of housing advice surgeries on local radio stations, and that Housing Options Service is represented at local events throughout the borough.

The council will be introducing a new homelessness Information Technology System in partnership with its main social housing provider which will enable housing options staff to supplement their advice with an electronic service which gathers information about the household involved using a wizard, and produces a comprehensive, personalised action plan. Key benefits include:

- Less time spent on interviews
- Greater consistency of advice offered
- New staff can be trained more effectively
- Improved levels of homelessness prevention

The council will also develop a step by step guide to empower people to have the confidence to try and address their own housing issues which will also signpost to voluntary agencies that could offer emotional support.

The service will be also providing new documentation which will signpost households in housing difficulty to ways in which they can help themselves by providing the right information at the right time and prevent people from reaching crisis point.

Chapter 7 – Resourcing our strategic priorities

To achieve the objectives that have been set a variety of resources will be required - financial, physical (including land) and organisational capacity. The council's main sources of funding for housing related activity is, the HCA, Area Based Grant, the council's general fund and other government grants. The council's general fund is the central funding source for the council and contains the council's share of the council tax levied in the borough and income from other sources. This funding mix has within it inherent challenges. The council will be freezing its council tax charges which will lead to a reduction in spend available from the general fund. Government funding is also under considerable pressure at the moment with resources being reduced across public service. Any available resources are now being allocated where the greatest output can be generated and partners are being asked to work together to make best use of available public funds. As a consequence any reduction in funding availability from central government or locally will have a material effect on Walsall Council's ability to deliver services as planned.

We want to maximise investment opportunities to ensure our housing vision and priorities are delivered. We will work closely with partner agencies including Housing Associations, the Homes and Communities agency and other councils within the region to secure external funding and increase the range of resources available.

The Site Allocation Development Plan Document and Walsall Town Centre Area Action Plan will be prepared in 2011-13. These documents will identify sites for housing, as well as other uses, and we will continue to work together to develop mechanisms to deliver these sites including public and private sector funding.

Capital resources

The Capital Strategy is the council's financial management framework. It determines the level of capital resources available and sets out the processes and policies which influence capital investment.

The Capital Programme sets out the council's investment priorities over the next 4 years and how it's financed through a mixture of borrowing, capital receipts and specific grants from the Government. Table 1 provides details of our indicative programme.

Table 1 – Indicative Housing Capital Programme

	2010/11 £000's	2011/12 £000's	2012/13 £000's	2013/14 £000's	
Funded through Mainstream					
Aids and Adaptations	1,500	1,500	1,500	1,500	
Preventative Adaptations	0	1,000	1,000	1,000	
Supporting Independence	0	226	396	483	
Total Housing Capital funded through Mainstream	1,500	2,726	2,896	2,983	
Funded through other sources					
Disabled Facilities Grant	1,219	1,351	1,351	1,351	
Regional Housing Pot	5457	0	0	0	
New Growth Points	460	72	0	0	
Total Housing Capital Funded through Other Resources	7136	1423	1,351	1,351	
Total Housing Capital Programme	8636	4149	4247	4334	

The programme is kept under constant review throughout the year to ensure the delivery of capital priorities. It is scrutinised at a senior management level and regular reports are submitted to Cabinet detailing actual expenditure and outputs against the budget.

Revenue Resources

The estimate of revenue expenditure for the housing role of the council is detailed in Table 2. These estimates were derived from the budget approach highlighted within the context of this Section.

Table 2- Revenue Resources

Revenue estimates of housing expenditure	2010/11 £000's	2011/12 £000's	2012/13 £000's	2013/14 £000's
Housing Standards and Improvements	581	581	584	587
Housing Strategy & Partnerships	431	377	379	381
Supported Housing	662	653	656	660
Net budget	1,674	1,611	1,619	1,628

Other sources of funding

Strategic Housing receives grants from CLG that are targeted at delivering specific services such as Homelessness. Table 3 details our additional sources of funding.

Table 3 – Other sources of funding

	2010/11 £000's	2011/12 £000's	2012/13 £000's	2013/14 £000's
Income from RHP Loan	0	35	35	35
Homelessness Grant	80	140	140	140
Overcrowding Grant	80	75	0	0
Total Other Sources of Funding	160	250	175	175

Chapter 8 – Implementation, Monitoring and Review

We want to deliver high quality cost effective services to our residents. We know robust comprehensive performance management is essential in delivering excellent services for everyone. Our Corporate Integrated Planning and Performance Framework (IPPF) ensure performance management is an important part of our daily work.

A key element of the framework is the Corporate Plan which sets out the council's vision for the borough, its aims and objectives, and key priorities for the year ahead. It contributes to and is influenced by Walsall Borough Strategic Partnership Sustainable Community Strategy.

The framework brings together a range of environmental, economic and demographic information together with customer feedback that influences the design and delivery of our services.

Monitoring and reviewing our performance is carried out at every level of financial, service and individual planning processes to ensure continuous improvement.

We also monitor our performance against a set of local housing performance indicators on a monthly basis and the results are reported to the strategic housing performance board quarterly. This continuous monitoring enables us to assess the effectiveness of our strategy, processes and procedures. It also enables us to identify and respond to changes in trends.

The robust action plan included in this Strategy will ensure our housing priorities for the next five years are achieved. It will be implemented through existing partnership and working groups. The action plan will be monitored, reviewed and updated annually by Walsall Housing Partnership. The engagement and contribution of housing partners are essential to the delivery of the strategy and it is essential that the partnership is participative in order to respond to the challenges that are ahead.

The separate Homelessness Action Plan covers the next 12 months, and will be revised and published on an annual basis to ensure it continues to reflect the homelessness provision and prevention activity required to respond to the challenges of the current housing and economic climate.

Action Plan – Homelessness 2011/2012

Homelessness Outcome	Action Required	Target Date	Resources
Outcome 1 – Prevention of homelessness	Review the provision and process of delivering a Sanctuary Scheme	September 2011	Existing resources, including homeless prevention grant
	Explore good practice with local authorities regarding their approach and services available to victims of domestic abuse	October 2011	Existing resources, including homeless prevention grant
	Review Service Level Agreement with Citizens Advice Bureau (CAB) around provision of specialist services relating to repossessions/evictions	July 2011	Existing resources
	Review exiting Repossession Fund	October 2011	Existing resources
	Scope out financial initiatives to prevent homelessness with CAB partner	March 2012	Existing resources
	Understanding causes of exclusion & end of Assured Short-term Tenancies (ASTs)	March 2012	Existing resources
	Implement a Bond Scheme to secure accommodation in the private rented sector	March 2012	Existing resources
	Review relationship with Criminal Justice Service	March 2012	Existing resources
	Review MAPPA arrangements	March 2012	Existing resources
	Monitor impact of benefit changes for Housing Benefit	March 2012	Existing resources

	Pilot, in partnership advice surgeries to prevent homelessness with local college, Addaction and Lantern House	March 2012	Existing resources
	Review Homeless Prevention Award	March 2012	Existing resources
	Lead on regional activity around preventing and tackling rough sleeping connected to additional DCLG funding	March 2012	Existing resources and additional DCLG funding

Homelessness Outcome	Action Required	Target Date	Resources
Outcome 2 - Supporting customers to financial security, training and employment	Analyse and update existing working smarter data around our customer base/demand	March 2012	Existing resources, including homeless prevention grant
	Introduce a number of self help options for customers	March 2012	Existing resources
	Review 1/3,1/3,1/3 scheme and promote take up	December 2011	Existing resources, including homeless prevention grant

Homelessness Outcome	Action Required	Target Date	Resources
Outcome 3 - Providing easy access to accommodation and support that maximises self help	Explore what an effective service gateway to accommodation and support looks like	March 2012	Current resources
	Scope out what new services we could offer/commission to prevent youth homelessness, multiple exclusions and improve outcomes whilst delivering better value for money	March 2012	Existing resources, Homeless Prevention grant and possible JCU

Action Plan – Housing Strategy 2011-2016

Priorities	Milestones	Targets / dates	Partners
Tackling fuel poverty and improving the quality and energy efficiency of existing and future homes	Review effectiveness of Housing Renewal Assistance Policy	Annually	Walsall council
	Explore the viability of the use of personal budgets and adaptations	March 2013	Walsall council Voluntary sector
	Promote handyperson scheme to targeted areas in the borough	On-going	Walsall council Voluntary sector Registered Providers
	Investigate the viability of a loan product which enables owner occupiers to release equity in their homes	March 2013	Walsall council
	Develop a Empty Dwelling Management Order (EDMO) agreement with housing partners	March 2013	Walsall council Registered Providers
	Monitor and Review Housing Enforcement Policy	Annually	Walsall council
	Deliver in partnership with Homestamp an Education project in secondary schools	March 2012	Walsall council Homestamp Consortium
	Conduct a Private Sector Stock Condition survey	March 2013	Walsall council Homestamp Consortium NHS Walsall
	Conduct research into the locations of HMOs in Walsall	March 2013	Walsall council Voluntary sector Registered Providers
	Develop Affordable Warmth and Green Deal Strategy	May 2012	Walsall council Voluntary sector Registered Providers NHS Walsall
	Continue to develop accreditation scheme to the private rented sector not currently engaged	Annually 25 November	Walsall Council Private landlords

Priorities	Milestones	Targets / dates	Partners
Addressing different needs and promoting independent living, health and well-being	Support delivery of Telecare and Telehealth linked to the community alarms service	March 2013	Walsall council Voluntary sector
	Work with developers and house-builders to encourage them to build to Lifetime Homes Standard	On-going	Walsall council Development Partners Registered Providers
	Support the evaluation of Extra Care type developments	On-going	Walsall council Development Partners Registered Providers
	Research the Housing needs and aspirations of different groups and new and emerging communities	March 2012	Walsall council Voluntary sector Registered Providers

Priorities	Milestones	Targets / dates	Partners
Increasing Housing choice and employment opportunities	Support the council's work in addressing worklessness and ensure that new developments generate employment opportunities for Walsall residents	Ongoing	Walsall Council
	Support private and voluntary sector to integrate into housing, training and employment opportunities.	Ongoing	Walsall Council
	Support implementation of Timber Frame Unit Factory	On going	Walsall Council
	Produce LIP Delivery Plan	November 2011	Walsall Council
	Complete a Strategic Housing Market Assessment	July 2012	Walsall Council Black Country Local Authorities
	Enable 500 units of affordable housing over the five years of the strategy	2016	Walsall council Registered Providers Developers HCA
	Revise Affordable Housing Supplementary Planning Document (SPD)	September 2012	Walsall council Registered Providers Developers HCA
	Develop Tenure Strategy	April 2012 (as determined by the Localism Bill)	Walsall Council Registered Providers
	Assess impact of welfare reform bill	December 2011	Walsall Council Registered Providers
	Produce an action programme for use of New Homes Bonus	December 2011	Walsall Council
	Consider whether to review the thresholds for affordable housing provision on new development	January 2013	Walsall council
	Work with RSL's to identify 'value for money properties to purchase for affordable housing on the open market	March 2013	Walsall council Registered Providers

	Broaden the under occupation working group to enable them to initiate and co-ordinate the review of under occupancy across the borough	March 2013	Walsall council Registered Providers
	Identify potential additional permanent pitches for Gypsies and Travellers	March 2013	Walsall council Sub Regional Partners HCA
	Review Housing strategy action plan	Annually	Walsall council
	Work with registered providers to provide private landlords with methods of advertising their properties via a Choice based Letting scheme.	March 2012	Walsall council Voluntary sector Registered Providers NHS Walsall

Priorities	Milestones	Targets / dates	Partners
Value for Money	Examine opportunities for service improvement as part of transformational service reviews	March 2013	Walsall council
	Continually review our processes to ensure we are working effectively and efficiently	2016	Walsall council
	Continue to engage in benchmarking costs and quality	2016	Walsall council
	Continue to monitor customer satisfaction	2016	Walsall council
	Monitor and Review Housing Enforcement Policy	Annually	Walsall council
	Deliver in partnership with Homestamp an Education project in secondary schools	March 2012	Walsall council Homestamp Consortium
