

BRIEFING NOTE

TO: Community Services Scrutiny and Performance Panel

DATE: 15 October 2009

RE: Local Neighbourhood Partnership (Neighbourhood Management) Review

1. Purpose

This briefing note informs the Panel of progress made with the consultation on the future of Local Neighbourhood Partnerships (LNPs). Attached at appendix 1 is the revised version (v10) of the proposed neighbourhood management model.

2. Background Information

Walsall Partnership became the governance structure for LNPs in 2006. Due to budget pressure, diminishing grants supporting LNPs and the need for Walsall Partnership to fulfil its governance role of LNPs in a partnership approach, a review of LNPs was initiated jointly by the Chief Executive and Leader of Walsall Council in September 2008.

To support this, Walsall Partnership secured funding for a consultant to undertake a review through the West Midlands Regional Improvement and Efficiency Partnership (WMRIEP). Chris Allen is the Neighbourhood Renewal Adviser (NRS) appointed to this assignment and he presented his report to the Partnership on 9 March 2009.

There has been extensive consultation with elected members, partners and LNPs and all comments have been considering in producing the attached proposed neighbourhood management model. Information has also been available on the Walsall Partnership website.

Walsall Partnership is looking to implement the new model in 2010 following full and extensive consultation.

A DEVELOPING MODEL FOR NEIGHBOURHOOD MANAGEMENT IN WALSALL

Tracking the evolution of Walsall's model for neighbourhood management (25/9/09)

	Issue	Source	Proposed Resolution
1	Levels at which issues are dealt with to be defined (local, area, borough: 0, 1, 2)	Working group	To work through with Neighbourhood Coordinators
2	Public forums to be planned - to empower local people	Working group	Paper by C Wright / Cllr I Shires
3	Too much structure/staff	Working group	Reduce to Neighbourhood Coordinators only
4	Inequality of six Areas	Cllr T Oliver	Keep Areas as described but have two Coordinators in (Bloxwich/Blakenall/Birchills/Leamore) and (St Matthew's/Paddock/Palfrey/Pleck)
5	Role of neighbourhood forums	Cllr T Oliver	Build into solution at 2 above
6	More public engagement in decision-making processes	Cllr T Oliver	Build into solution at 2 above
7	Dislike of £10,000 for councillors	Cllr T Oliver and other consultations	Take out of proposal and put to council as separate decision
8	Local influence over mainstream budgets	Cllr I Shires Cllr T Oliver	Draft into solution at 2
9	Method and scope of appointment of Neighbourhood Managers	Cllr T Oliver	Appointment process to be proposed and agreed by sub-group
10	Issue over control of partner staff – when intention is to co-ordinate	L Walford Others	Amend document to mean co-ordinate and not control over partner staff. Also, co-ordinated services rather than integrated public services

A DEVELOPING MODEL FOR NEIGHBOURHOOD MANAGEMENT IN WALSALL

1 Purpose

This document sets out our proposals for delivering a model of neighbourhood management in Walsall. This follows an extensive consultation during which the proposals have been improved and revised, based on feedback received.

Our vision for Walsall is set out in the Sustainable Communities Strategy (SCA). This sets out challenging objectives and aspirations for the future of the borough as a whole. But Walsall is made up of many different places, with different needs and different communities with a history that provides us with many challenges as well as opportunities. We therefore need to find a way of expressing *local* priorities and providing *local* solutions.

So we are creating Community Partnerships, each with responsibility for an area of the borough, to help achieve this. Their purpose will be to:

- Engage with local communities to identify the key priorities for the area, which reflect resident concerns but which are also informed by data and intelligence and which complement borough-wide objectives
- Equip and empower local communities to solve local problems. A key way to do this will be enabling local people and their representatives the opportunity to influence the allocation of public resources to ensure these are sensitive to local priorities.
- Ensure that the delivery of public services is properly co-ordinated resulting in better services for our communities and a more efficient use of resources.

The Community Partnerships will work with elected representatives, public service providers, the private sector, social landlords and the third sector, alongside local communities to achieve these goals.

Public service providers will align the operation and delivery of their services to the Community Partnerships so that there is much closer collaboration in addressing local issues. We will adopt a neighbourhood management model whereby, for many local services, there is a single manager whose role is to co-ordinate and be accountable to the Community Partnership for how services are delivered in their area. We have an ambition to empower local people and groups and support them by delivering better co-ordinated services that work together to respond to local needs. Our Community Partnerships offer sound platforms to take this ambition forward.

Within all areas of the borough there are particular neighbourhoods which experience the most acute problems and this too will vary greatly across the

borough. Each Community Partnership will identify one key neighbourhood within its area where it wants to focus special attention. In the most deprived areas there will be two neighbourhoods upon which special attention is focused. This may be around a particular community, or group of families or individuals. The partnership will work locally to agree a plan for empowering communities and support this by concentrating the effort of service providers to address the particular problems of this community. It is anticipated that the focus of attention for the Community Partnership will change over time.

2 Context

Local Neighbourhood Partnerships (LNPs) have been operating in Walsall for five years. Initially, LNPs were an exemplar for community engagement and Walsall's LNPs won national awards. However, the demand and expectations for high quality engagement, giving local people influence over services and priorities in their area, has increased. In 2008, the Chair of Walsall Partnership and the Chief Executive of Walsall Council ordered a review of LNPs to be undertaken by Walsall Partnership. Independent consultant support was secured with the support of the Regional Improvement and Efficiency Partnership (RIEP). Partners and LNPs were widely consulted about issues and changes needed. A sub-group of Walsall Partnership was created to oversee the review.

This report represents the conclusion of the LNP review in the form of a model for the future operation of neighbourhood management. In summary, the key changes proposed can be categorised as follows:

- The areas
- Delivery structures
- Accountability and responsibility for results
- Community engagement
- Partner co-ordination and governance
- Role of elected members

The model for Walsall takes elements of and learns lessons from other local authority areas – primarily Blackpool, Birmingham, Nottingham and Shropshire – whilst retaining some of the existing components that work well locally.

3 Implications

The implications of this document are that all partners will need to operate in a more co-ordinated way to empower local people by engaging and responding to local communities. The model will enable real influence over resources locally and could also represent significant cost savings whilst improving both community engagement and results, but this requires significant organisational culture change and a buy-in from governance structures. The

changes proposed are radical and will work best if all partners commit fully. It will require partners to work together and agree for their staff to be tasked by and report into partnership meetings convened by the Neighbourhood Coordinator. It will also require partners to make their resources, particularly staff, available in a different way.

Existing localised partnership arrangements (such as GP practice-based clusters, Children’s Area Partnerships or community policing) will need to be aligned. In addition, the ability to meet statutory requirements (such as the Duty to Involve and those assigned to the Children’s Trust) need to be borne in mind and aligned.

4 The areas

To overcome the discontent with LNP boundaries, it is proposed to divide Walsall into six community areas, using ward boundaries as the building blocks.

Within each community area there will be one or two neighbourhoods of special focus. These will be relatively small, locally identified places where a concentrated effort of the community and service providers working together is needed. The purpose of this focus will be to solve the issues and problems that are experienced locally. The boundary for this neighbourhood will be determined in two ways:

- 1) Consultation locally
- 2) A statistical assessment of needs/issues

5 Delivery structures

The neighbourhood management model will operate at four levels as follows:

	Borough	Area	Ward	Focus Neighbourhood
Coordinating group	Walsall Partnership	Area Partnership (monthly)	Community Meeting (at least quarterly)	Tasking Meeting (weekly)
Membership of group		Local partners	Elected members	Public sector
		Elected members Children’s Health Police	Locally-appointed representatives Neighbourhood	VCS Housing associations
Function of group	Governance	Coordination: Area plan	Empowering action:	

		Area tasking Coordinating engagement	Ward plans Influence budgets	
--	--	--	------------------------------------	--

6 Accountability and responsibility for results

Each community area will have a Neighbourhood Coordinator of sufficient level and gravitas to have real influence over council and partner services. They will be responsible for key results across the community area and in the identified neighbourhood of special focus and be accountable for achieving results.

It is proposed that management in the larger community areas will be light-touch, involving monthly co-ordination meetings across partners. This will result in a joined-up approach to community engagement, improved planning about resource allocation and a sharing of resources.

In the identified neighbourhood partner co-ordination and engagement will be more intensive with weekly tasking meetings. The Neighbourhood Coordinator will co-ordinate an appropriate and wide range of council and partner staff, determined by the needs of each neighbourhood.

Neighbourhood Managers will hold small budgets of £20k for their community area and £20k for their neighbourhood to solve small local problems quickly. However, the emphasis will be on enabling local people to influence wider mainstream resources and to improve the responsiveness of services to the needs of local people.

7 Improving community engagement

The Neighbourhood Coordinator will co-ordinate community engagement in their area and facilitate co-operation between services. Innovative ways of engaging local people will be used. This will operate by taking the meetings to the people and using staff from all partner organisations to engage people on a broad range of issues not just those relevant to their own job.

Co-ordinating engagement will make it more efficient. With all partner and council staff working in this way, those people who are usually overlooked and not engaged are more likely to be reached.

The priorities and tasks for partners in community areas and identified neighbourhoods will be determined by local engagement.

Under new legislation, public service providers have a duty to involve local people in the planning, design and delivery of services. The ladder of engagement is a frequently-used model to understand levels of engagement as follows:

Information	<p>Providing information (e.g. about the existence of a service, results of a decision)</p> <p>Tends to be a one-way communication</p>
Education	<p>Explaining or raising awareness of something – often in order to change attitudes/action</p> <p>Tends to be one-way communication</p>
Consultation	<p>Asking opinions – this can including questionnaires asking for reactions to a particular decision, voting, market research, focus groups and debate</p> <p>Can be two-way communication (e.g. if participants are informed of the results) but final decisions are made by those who are doing the consulting</p>
Involvement	<p>Where more than just opinions are sought – participants may be part of the solution through taking action, endorsing something, etc.</p> <p>Communication must be two-way, but responsibilities are not necessarily formally set out and relationships between participants may remain unclear</p>
Partnership	<p>Direct involvement in decision making and action, with all parties having clear roles and responsibilities and powers – usually for a defined purpose / shared common goal</p> <p>Two-way communication essential</p>
Devolved Power (Empowerment)	<p>Giving away decision making, resources and control</p> <p>There should also be clear lines of accountability and should involve two-way communication with those giving away the power</p>

Our engagement activity will aim towards empowerment and offering opportunities for our communities to influence the allocation of public resources. We expect to deliver better co-ordinated and more effective engagement. All engagement should be logged using Viewfinder so that information is captured and so that we can communicate to communities along the lines of:

“We asked – You said – We did”

8 Improving partner co-ordination and governance

The Neighbourhood Coordinators will convene Community Partnerships covering the larger area consisting of appropriate partners. The partnerships will meet monthly to co-ordinate and plan engagement and the partners' response to engagement through a tasking process. This will include issues raised by elected members and locally-appointed representatives through their community meetings. The Community Partnerships will act as mini Local Strategic Partnerships (LSPs) and report into Walsall Partnership.

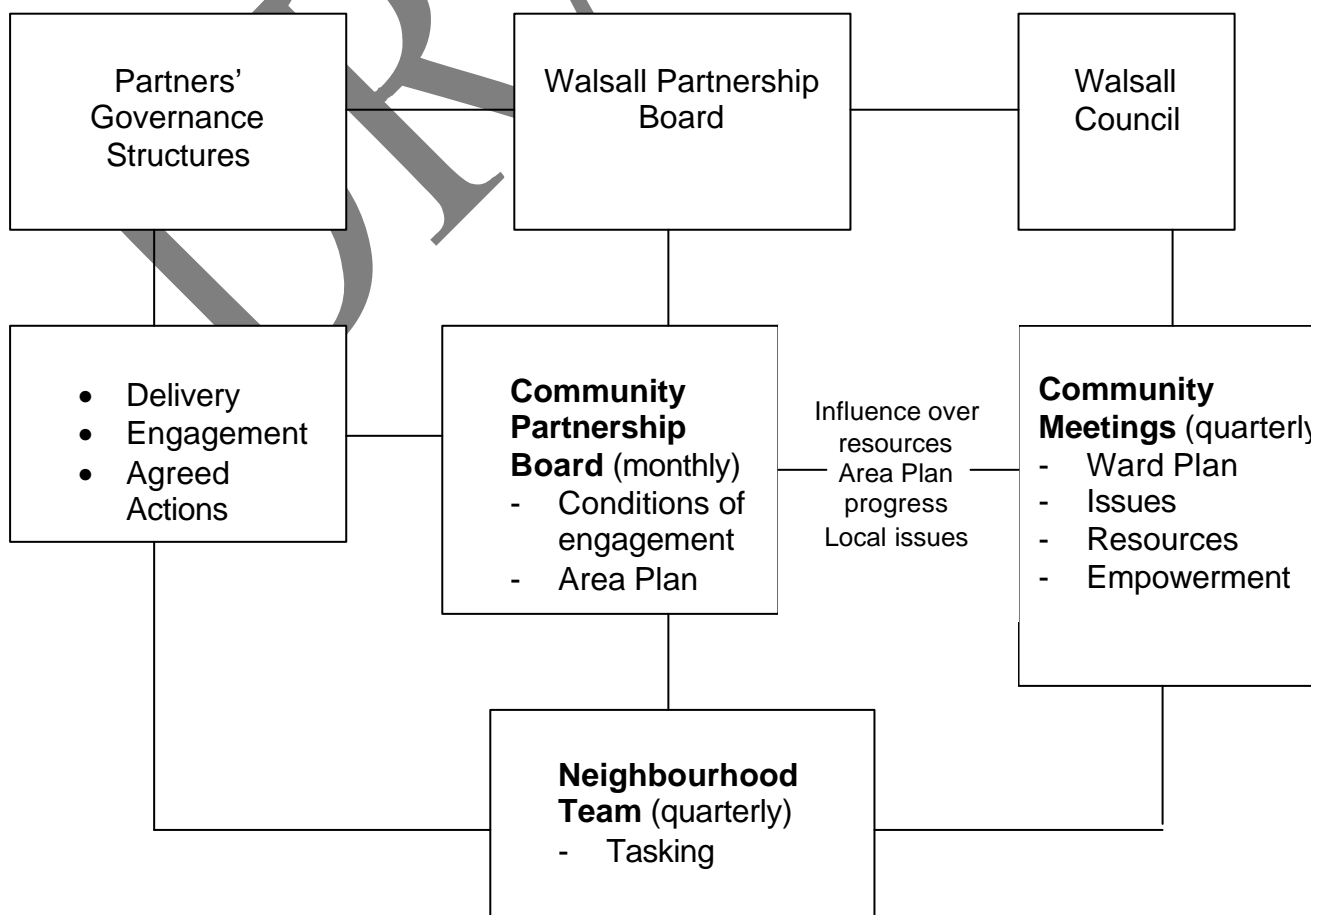

In the neighbourhoods of special focus, the process will be more intensive. Neighbourhood Coordinators will co-ordinate the tasking of partners on a weekly basis through formal tasking meetings.

The key principle of operation will be to empower local people and communicate on the basis of:

“We asked – You said – We did”

Neighbourhood Managers and their teams will be located in the neighbourhood. Existing accommodation held by partners will be utilised wherever possible.

A Model of Operation

9 Role of elected members

Elected members have a key role to play in running community meetings with the support of Constitutional Services. Community meetings will be held quarterly in each ward, but councillors may choose to group together with other wards in their area.

The key purpose of community meetings is to empower local people and groups such as neighbourhood forums and voluntary and community sector groups. These meetings will set a plan for the ward and raise aspirations by encouraging local people to take action. Community meetings will be given information on mainstream public budgets used in their ward. They will be able to influence these budgets and redirect funding towards local priorities.

Community meetings will also be an opportunity for local people to report issues and to hear about progress. Local partners may be invited to attend community meetings as appropriate.

There will be a degree of flexibility in terms of how councillors run their community meetings and the emphasis they give to the meeting context.

10 Proposed staffing – partner commitment

The cost of this model to each partner depends on how they contribute. The assumption is that partners will provide some of the Neighbourhood Coordinators and the result should be better use of existing resources.

The Walsall Partnership LNP review group agreed that the key staff needed are the coordinators and that any additional resource should be provided by the partners or through training/volunteering.

Costs per community area:

Neighbourhood Coordinator	£50,000 + oncosts
Apprentice	£10,000 + oncosts
Rent/running costs ('in kind' expected)	£15,000
Stationery/training/publicity/travel	£10,000
Local budget	£40,000
TOTAL	£125,000

In the Bloxwich/Blakenall/Birchills area and St Matthew's/Paddock/Palfrey/Pleck area it is recognised that there needs to be a greater intensity. It is proposed that, in these areas, two Neighbourhood Coordinators are appointed, but the areas' boundaries remain the same. This will enable a second neighbourhood of special focus to be created.

Additional costs for Bloxwich/Blakenall/Birchills and St Matthew's /Paddock/Palfrey/Pleck:

Neighbourhood Coordinator	£50,000 + oncosts
Apprentice	£10,000 + oncosts
Rent/running costs ('in kind' expected)	£15,000
Stationery/training/publicity/travel	£10,000
Local budget	£20,000
TOTAL	£105,000

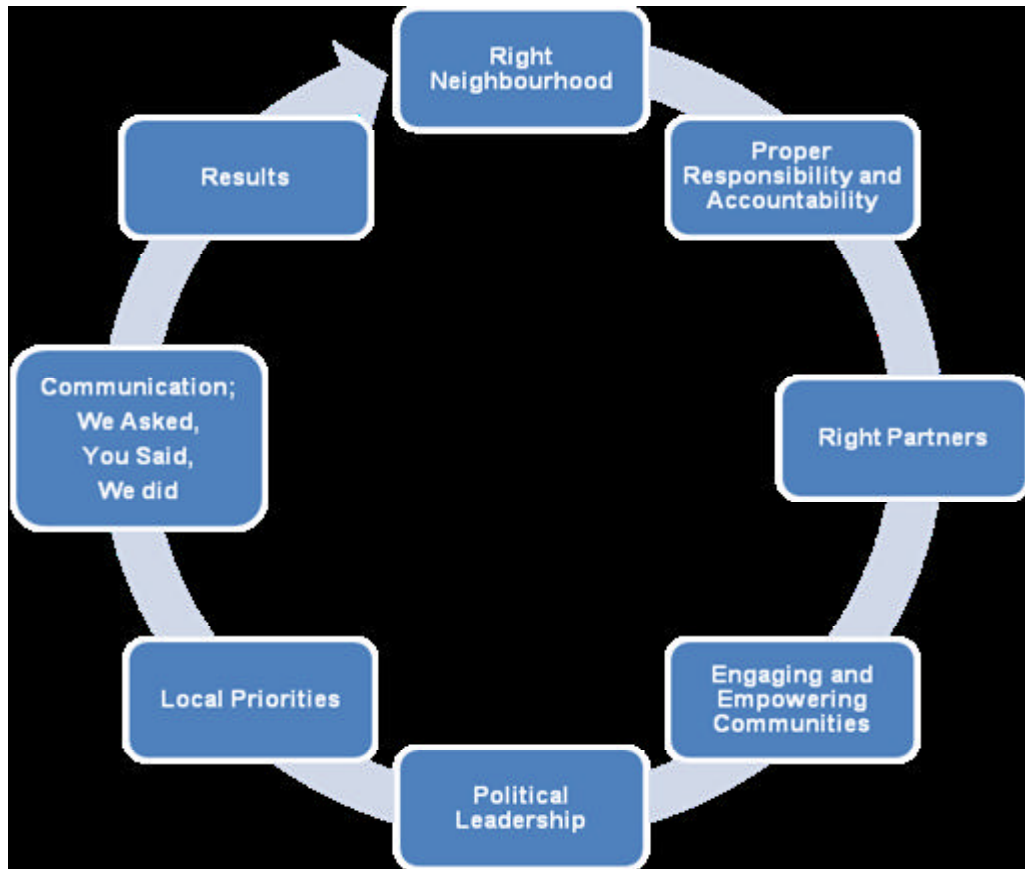

Total costs:

6 x £125,000	£750,000
2 x £105,000	£210,000
Head of Service (£65,000 + oncosts)	£80,000
Central administration	£40,000
TOTAL	£1,100,000

11 Communications

Good communication is essential to the model being perceived to be successful. A more detailed communications plan is to be drawn up and the responsibility for this is to be charged to the Walsall Partnership communications group.

12 Key process

13 Table of functions

Community Areas	Neighbourhoods	Accountability	Engagement	Co-ordination	Political Leadership
<p>Walsall divided into 6 large Community Areas using ward boundaries</p> <p>Light-touch co-ordination</p> <p>£20k budget for Community Area, held by Neighbourhood Manager</p>	<p>1 Neighbourhood within each Community Area</p> <p>Determined by need</p> <p>Defined by communities</p> <p>May cross traditional (ward) boundaries</p> <p>Functional management over partners' staff</p> <p>Tasking meeting (1 per week)</p> <p>All issues communicated</p> <p>£20k budget held for neighbourhood by Neighbourhood Manager</p>	<p>Neighbourhood Manager (NM) accountable for results</p> <p>NM co-ordinates in Community Areas</p> <p>NM has functional management over partners' staff in neighbourhoods</p> <p>Partners and individuals responsible for tasks</p> <p>All public service workers become engagement officers</p>	<p>Engaging people where they naturally congregate: in their street/supermarket</p> <p>All public sector employees engaging on all issues</p> <p>(Police engaging people on health/education)</p> <p>All feedback captured</p> <p>All issues communicated: We asked – You said – We did</p> <p>Local priorities identified and addressed</p>	<p>Community Partnership Meeting (1 per month)</p> <p>Community Area Plan is produced</p> <p>Partners responsible for tasks</p> <p>Issues from public meetings fed in by elected members</p> <p>All issues communicated: We asked – You said – We did</p> <p>Resources coming in to the area are understood and open to influence</p>	<p>Public meetings (4 per year in each Ward)</p> <p>Elected members feed issue to Community Area tasking</p> <p>Elected members communicate: We asked – You said – We did</p> <p>Ward Plans are produced to inform Area Plans</p> <p>Community Partnership held to account</p> <p>Influence over resources</p>

14 Going forward

Formal consultation on the developing model began at Walsall Partnership Board on 13 July 2009. Individual meetings with partners have been arranged, each political group is being briefed and consulted and a report will be taken to the September/October LNP meetings. A detailed project plan is in place covering key milestones from consultation to implementation.

DRAFT

Tracking the evolution of Walsall's model for neighbourhood management (11/9/09)

What did the LNP review tell us?	What the research/consultation is telling us	What could this mean for Walsall
AREAS		
Not raised as an issue	Blackpool – Light-touch approach borough-wide, more focused approach in areas of need Warrington – 5 area boards, borough-wide coverage Local consultation – data analysts recommend consideration of identifiable neighbourhoods and size of populations	General co-ordination in all areas Select areas of higher/more intense focus, not necessarily ward or LNP boundaries, but natural communities.
ACCOUNTABILITY AND RESPONSIBILITY		
<ul style="list-style-type: none"> • Evidencing that they are able to get things done • Being able to deal with difficult people 	Blackpool – 3 area managers (Heads of an area) with clear responsibilities Warrington – emerging. Heads of service chair Area Boards	Higher level co-ordinator posts Functional management of staff in neighbourhoods Area and neighbourhood budgets
IMPROVING COMMUNITY ENGAGEMENT		
<ul style="list-style-type: none"> • Raising the profile about the work that LNPs do • Celebrating successes in their area • Using the talents of LNP members • Learning from good practice in other LNP 	Blackpool – local priorities are what people see and experience, local indicators, make a quick impact Warrington – quick wins, engaging third sector, local surveys	Co-ordinate engagement to set priorities Creative community engagement “We asked, you said, we did...”

What did the LNP review tell us?	What the research/consultation is telling us	What could this mean for Walsall
areas	Local consultation – where in the structure is there an opportunity to engage community leaders	
IMPROVING PARTNER CO-ORDINATION AND GOVERNANCE		
<ul style="list-style-type: none"> • All partners being able to participate equally • Ability to influence • Need for delegated powers 	<p>Blackpool – separate co-ordination of partners from consultation and engagement. Use partner resources. SLAs with partners.</p> <p>Warrington – Area boards, chaired by head of service. Themed working groups looking at priorities. Evidence based approach. Action planning events</p>	<p>Groups that co-ordinate partners</p> <p>Broaden tasking beyond crime and disorder</p> <p>Area teams made up of staff from partners Set local indicators, quick wins</p> <p>Develop SLAs</p> <p>Include and use 3rd sector organisations</p>
ROLE OF ELECTED MEMBERS		
<ul style="list-style-type: none"> • Meetings dominated by councillors, barrier to participation 	<p>Blackpool – ward forums with community representatives. Councillors hold individual budgets</p> <p>Warrington – early days. Elected member engagement is strong</p>	<p>Regular ward forums – open to the public</p> <p>Council allocates individual budgets for elected members</p> <p>Inform area and neighbourhood priorities</p>
